Updated: June 25, 2026

Past forecasting results at www.meyersreport.news. Forecasts for **2026 - 2027** are updated as events occur. **Forecasting team** of subject experts listed below.

Note: The Meyers Report forecasts should not be considered as recommendations for any investments, purchases, or other financial use by the reader.

No	Forecast / Event / Activity	Forecast Date	Result
1	**Black Cygnet.** We see potential **Black Cygnets** in the form of a new (questionable) form of "bird flu" panic, which will be diagnosed (discovered) that will have some people and possibly government agencies unnecessarily calling for the culling of chicken and other flocks.	**10/1/2025**	**Jan. 2026.** West Flanders (Belgium) outbreak in Jan 2026 saw mass culling of over **5 million birds** to contain highly pathogenic strain.
2	**Potential Black Swan.** An outbreak of Swine Flu in Spain and South Korea, plus a Screw Worm outbreak in Mexican cattle could be a combination significant impact on the costs for pork, beef, and substitute animal protein sources.	**10/1/2025**	**1/29/2026 To fight Screw Worm coming from Mexico, Governor Greg Abbott issued** a statewide disaster declaration to mobilize resources. **6/3/2026 (Epoch Times) Reports "Flesh-Eating Screwworm Detected: USDA"**
3	**Terrorist cells identified. In 2026 and 2027**, it will come out that ICE and the FBI quietly have been rooting out terror cells which are manned, trained, armed and financed by the CCP (Chinese Communist Party), South American and Mexican cartels, Muslim jihadists, and George Soros-type nihilists. The risks will be possible attacks on US infrastructure, or routinized attacks on public gathering places.	**10/1/2025**	**3/1/2026 (FOX News**) Former FBI official warns of sleeper cells (Hezbollah and Hamas) in the US amid strikes on Iran. **3/15/2026 US media warn** about Iranian and jihadist terror cells**. 9/22/25 (WhiteHouse.Gov) Antifa is designated a domestic terrorist organization** in the wake of the Charlie Kirk assassination and the attacks on ICE personnel.
4	**January 6th events will be reviewed.** Capital Policeman who shot Ashley Babbit will be charged or at least sanctioned after hidden video and other evidence is released to public and opinions will be changed. ***(Oct. 25, 2025)** More information of government involvement will be revealed with government agencies and individuals meeting with civil penalties assessed and/or prosecutions in 2026 or 2027.	**11/13/2024**	**12/11/24 The DOJ Office of Inspector General reported** that there were 26 FBI informants at the J-6 demonstration, with at least 4 entering the Capitol. CNN continues to deny Feds presence and involvement: https://www.cnn.com/2024/12/13/politics/video/january-6-right-wing-claims-fbi-crowd-report-mccabe-cnntm-digvid **1/7/2025** Trump states that revealing the truth about Jan. 6th a priority. **1/20/25 Trump announces reviews** of government activity for J-6. **1/20/25 J-6 Prisoners pardoned. 2/5/25 AG Pam Bondi opens investigation** into J-6 event and investigations. **5/19/2025 (CBS and Washington Post)** report US Government to pay wrongful death settlement to Ashli Babbitt. **4/12/2026 (DNI) Previously undisclosed documents alleging misconduct and politicization** within elements of the intelligence community related to the 2019 Trump impeachment investigation.
5	**Senate Filibuster rule** (for at least 2026 through 2028) in the US Senate will survive during Republican control of Congress. Look for an effort to remove rule if and when the Democrats gain control of the Senate. Congressional institutional rules In 2021 the Democrats tried and failed to remove the Filibuster when they had control of the Senate. **In the end, our forecast is that the Filibuster will survive.**	**11/1/2024**	**11/12/25 Continuing (budget) Resolution passed**. Republicans continue to maintain Filibuster rule. **Status as of May 7, 2026: Accurate so far.** The filibuster rule remains fully intact under current Republican Senate control. Basis and latest data: Senate Rules Committee procedural update April 2026; Congressional Record entry May 1, 2026.

Updated: June 25, 2026

Past forecasting results at www.meyersreport.news. Forecasts for **2026 - 2027** are updated as events occur. **Forecasting team** of subject experts listed below.

Note: The Meyers Report forecasts should not be considered as recommendations for any investments, purchases, or other financial use by the reader.

No	Forecast / Event / Activity	Forecast Date	Result
6	**ACE Act will not get the needed bi-partisan support in 2026** and likely in 2027 as Democrats doggedly fight election reforms.	**11/1/2024**	**3/1/26 Republicans fight to maintain the filibuster** despite short-term incentives to can it, such as the Save Act. **Status as of May 7, 2026: On track.** The ACE Act has been introduced in the House but lacks bipartisan support and remains stalled in the Senate.
7	**Republicans win 2026 mid-term elections** and retain the House because of economic boom, peace dividend, and Mid-decennial redistricting, and prosecutions of political crimes by past and present members of the US government.	**11/11/2024**	**Status as of May 7, 2026: Too early.** Midterms are still six months away; generic ballot polling remains mixed. **Basis and latest data: RealClearPolitics polling average as of May 6, 2026.**
8	**Republicans win 2026 mid-term elections** and retain the Senate because of economic boom, peace dividend, and Mid-decennial redistricting, and prosecutions of political crimes by past and present members of the US government.	**11/11/2024**	**Status as of May 7, 2026: Too early.** Midterms are still six months away; generic ballot polling remains mixed. **Basis and latest data:** RealClearPolitics polling average as of May 6, 2026.
9	**11/25/25 Expect prosecutions** of political crimes by past and present members of Congress to become more public beginning in April or May of 2026.	**11/11/2024**	**4/28/2026 James Comey indicted a second time** for promoting threat against the President of the United States. Failed DOJ push in February 2026 to indict six Democratic lawmakers (including Sens. Mark Kelly and Elissa Slotkin) over a video urging military/intelligence personnel to refuse "illegal orders." A grand jury rejected it. **Status as of May 19, 2026: (HKLaw.com and Ballotpedia.org) Partially on track**/ramping up. Congressional investigations and ethics probes have increased in visibility since April 2026, with several high-profile cases involving current and former members drawing public attention (e.g., resignations tied to allegations, ethics referrals). **5/21/2026 Rep. Sheila Cherfilus-McCormick indicted for wire fraud**, money laundering, misuse of FEMA disaster funds for her campaign.
10	**In 2026 the UOCAVA (Uniformed and Overseas Citizens Absentee Voting Act) to be strengthened**, because currently the act has been exploited to allow non-military to vote with little or no documentation or verification. Overseas military and civilian voting will be separated. If it does not get Federal action, look for action on the state level or both. **Credit should be given Sec. Hegseth for tightening documented proof of citizenship and documents proof of residence.**	**11/11/2024**	**Status as of May 7, 2026: Partially on track.** Pilot programs and state guidance for DD 2058-based registration issued; nationwide mandate not yet fully enacted. **Basis and latest data:** Federal Voting Assistance Program bulletin April 2026.

THE MEYERS REPORT Forecasts for 2026 - 2027

https://meyersreport.news/

Updated: June 25, 2026

Past forecasting results at www.meyersreport.news. Forecasts for **2026 - 2027** are updated as events occur. **Forecasting team** of subject experts listed below.

Note: The Meyers Report forecasts should not be considered as recommendations for any investments, purchases, or other financial use by the reader.

No	Forecast / Event / Activity	Forecast Date	Result
11	**The UOCAVA change. Military personnel and their dependence to be required to (1) register at their official home of record** on their DD 2058. (2) Federal employees and their dependents will be required to register at their home of record on their personal file. (3) Others abroad will be required to register in the District of Columbia and only vote in the presidential election.	**10/25/2025**	**Status as of May 7, 2026: Partially on track.** Multiple states have initiated enhanced NVRA list-maintenance audits and cleanups. **Basis and latest data:** ERIC program-related state withdrawal announcements and reports April 2026.
12	**Before 2028 the Help America Vote Act (HAVA) to be amended at the state level** to deal with paperless voting, particularly with machines that are foreign-made and are hackable. **3/25/2025 In the spirit of HAVA,** states will restricting paperless voting to only those with disabilities, which will be consistent with Trump's E.O. #14248.	**11/11/2024**	**Status as of May 7, 2026: Partially on track.** Several states have restricted paperless voting to disabled voters consistent with the referenced executive order; full HAVA amendments pending. **Basis and latest data:** National Conference of State Legislatures election reform tracker May 5, 2026.
13	**In 2026 NVRA (National Voter Registration Act) to be reviewed for proper voter eligibility and verifications and amended.** Known as "motor voter" act, allowed state DMVs to register voters when issuing drivers' licenses. This lacked the procedures and incentives for proper procedures. **10/25/2025 States will tighten the quality of their list maintenance in the spirit and intent of the NVRA.**	**11/11/2024**	**Status as of May 7, 2026: Partially on track.** Multiple states have initiated enhanced NVRA list-maintenance audits and cleanups. **Basis and latest data:** ERIC program-related state withdrawal announcements and reports April 2026.
14	**The 10-T Yield in 2026 should fall into the high 3.6% to 4.00% range** and should stay close 3% in 2027, **if inflation remains low**. **Updated 5/28/2026 Our adjustment is to 4% year end,** because of the Black Swan Iran war.	**11/11/2024 modified 5/28/2026**	**5/1/2026 T-10 yield was moving according to forecast and on Feb. 27, 2026 (the day before the War) fell to 3.97%, until the start of the Black Swan** the 47-year old Iran war went hot. Then inflation rose because of the war.
15	**2026 CPI** should range between 2.75% and ~~1.75%~~ **Modified 1/3/2026 down to 1.95%. 5/28/2026 Assuming the Iran war is settled by July 31st. Modified 5/28/2026 Inflation in the last half of the year**, 6 months ending December is 2.25%,with year-over-year CPI in December at 4%, again solely due to the war..	**11/11/2024 modified 5/28/2026**	**5/1/2026 monthly CPI averaged an annualize rate of 1.92%** from Oct. 2025 through Feb. 2026. **Until the Black Swan 47-year old Iran war went hot.** Then inflation rose because of the war.
16	**Core CPI** from February 28, 2027, ranges from 1.5% to 2.25% thereafter. The risks are on the upside. **Modified 5/28/2026 Core CPI to be 2.25%-2.5% range by year end, with the Y-O-Y at 3.0-3.5%,** because of the Iran war.	**11/11/2024 modified 5/28/2026**	**5/5/2026 As forecast, the Jan. and Feb. Core CPI fell to 2.51% and 2.47%**, respectively. The Core CPI only started rising in March when the Black Swan 47-year old Iran war went hot. Then inflation rose.
17	**WTI Oil Prices.** Look for prices have a wide range of $53 to $73 maximum range, but with a **2026 general range of $49-$65 per barrel. 5/28/2026 War adjustment. Assuming there is an Iran settlement By year end expect WTI oil prices to be down to $65**, possibly lower. There could be a short-term below that as stored oil stocks are released.	**11/11/2024 modified 5/28/2026**	**1/31/2026 WTI prices in January 2026 have averaged $60.04** per barrel, despite the late-month run up because of Iran tensions. **2/28/2026 WTI hits $67.01 due to US-Israeli attacks on Iran. 6/23/2026 (OilPrice.com) WTI closes at $72.71.**

Note: The Meyers Report forecasts should not be considered as recommendations for any investments, purchases, or other financial use by the reader.

No	Forecast / Event / Activity	Forecast Date	Result
18	**Brent North Sea Oil Prices.** Look for prices to wide range in the $57 to $77 maximum range, but with a **2026 general range of $57-$70 per barrel. 5/28/2026 War adjustment. Assuming there is an Iran settlement** By year end expect WTI oil prices to be down to $70, possibly a bit lower. However, there could be a short-term below that as stored oil stocks are released.	**11/11/2024 modified 5/28/2026**	**1/31/2026 Brent prices in January 2026 have averaged $65.54** per barrel, despite the late-month run up because of Iran tensions. **6/23/2026 (OilPrice.com) Brent closes at $72.71.**
19	**Strategic Oil Reserve** will continue gradual increase of 1%-2% reserve for 2026. **Modified 1/4/2026** This may increase if oil prices go into the $40s or lower, to rebuild the reserve and to support prices to sustain US producers. **Modified 4/27/2026 As Iran war appears to be getting close to a settlement, look for the US to start selling down the SPR** down to 33%while prices are high and then to buy back when prices fall. This could be accellerated if their is a sudden price drop trough.	**11/11/2024 modified 4/27/2026**	**4/3/2026 SPR rose at an annualized rate of 1.69%** from Nov.7, 2025 through April 3, 2026. **6/23/2026 (US EIA) May and June the US has been selling off the SPR** while prices were in the high $90 range.
20	**Home mortgage rates (30-Fixed)** peaked at 7.5% in 2024 and as forecast declined to 6.5% by end of 2025. For 2026 it should fall 5.5% vicinity and closer to the 5% range in 2027. **1/3/2026 Forecast modified for 2026** to a high of 6.25% to a general range of 6% down to 5.5% or lower. **Modified 5/28/2026 The Iran war cause higher rates. Look for rates to return to forecast levels by year end or in Q1 2027. By year end the 30-F should be at 6-6.25% and 15-F at 5.1-5.35%.**	**11/11/2024 modified 5/28/2026**	**1/31/2026 (FreddieMac) 30- and 15-Year Fix Rate mortgages** averaged 6.11% and 5.44%, respectively. **2/26/2026** (**FreddieMac)** Average 30-year Fixed rate mortgage at 5.98%. This held until the Black Swan the 47-year old Iran war went hot. Then inflation rose because of the war.

No	Forecast / Event / Activity	Forecast Date	Result
22	**Will Fauci be prosecuted?** While he should be for his Covid policies, any prosecutions will be limited to illegal payoffs and conflicts of interest.	**11/13/2024**	**1/20/25 Biden last minute blanket pardon** of Anthony Fauci prevents prosecution**. However, the pardon leaves Fauci and the others still liable for civil suits**, in addition Fauci lost his 5th Amendment defense should he be required to appear before Congress. **1/24/25 Fauci loses security clearence. 2/5/25: 17 State AGs investigating Fauci** Covid response. **3/17/2025 Fauci pardon may be voided because of unauthorized Biden auto-pen. 3/5/2025 Republican AGs want Fauci investigated** for Covid issues, ask Congress for help. **July 2025,** Senator Rand Paul renewed his referral of Fauci to the Department of Justice. **10/28/25 Release report calling for Congressional investigation** of unauthorized use of the autopen for pardons and EOs. **4/28/26 (FoxNews & Epocht Times) Ex-Fauci top advisor (David M. Morens) indicted over alleged COVID cover-up**, hidden emails. David Morens **allegedly received gifts including wine and high-end meals from a collaborator**, prosecutors say. **4/29/2026 Congressional Republicans, including Rand Paul and Nancy Mace**, publicly called for Fauci's prosecution in 2025–2026, particularly over allegations that he misled Congress about NIH funding connected to gain-of-function research in Wuhan. **5/11/2026 (NY Post) DOJ weighing new criminal case against Dr. Anthony Fauci** — despite Biden's autopen pardon and statute of limitations running out. **6/19/2026 Fauci accused of lying to Congress** about funding bio-labs in Ukraine and dozens of other countries.
23	**Mexico: Fighting Cartels.** Mexico and select South American nations will allow US Special Operations Groups to go after cartels in their country. **11/5/2025 update:** This will continue and grow in 2026 and 2027. Scheinbaum will be afforded "plausible" deniability. Over the next two years, Scheinbaum has a high risk of being assassinated.	**11/16/2024**	**11/27/24 Georgetown Journal of Intl. Affairs warns** of US intervention against cartels**. 12/24/24 Mexico News reports "46% Mexicans favor collaborating** with U.S. to fight Mexico's drug cartels." **12/27/24 WSJ reports Mexico concerned US** may strike cartels. **1/20/25 Trump declares Mexican Cartels Foreign Terrorist Organizations. 8/9/2025 US Military are fighting cartels in Mexico and South America. 9/2/2025 US Navy starts destroying cartel drug boats and crews on open seas. 12/5/2025 U.S.-Mexico cooperation (with US personnel),** Alfredo Ezequiel Galaviz Jr., a drug and human trafficker linked to the Jalisco New Generation Cartel (CJNG), was arrested in Chihuahua City, Mexico. **February 2026 (Associated Press)** U.S. military conducted another strike on an alleged drug-trafficking vessel in the eastern Pacific Ocean.

Note: The Meyers Report forecasts should not be considered as recommendations for any investments, purchases, or other financial use by the reader.

No	Forecast / Event / Activity	Forecast Date	Result
24	**Russia-Ukraine Settlement.** Will include Russia retaining Crimea and Russian-speaking eastern Donbas area. Otherwise, keeping the Donbas would be leave Ukraine with constant resistance from locals.	**1/24/2025**	**3/11/2025 Sec. of State Rubio announces Ukraine** has accepted the Trump peace plan and will meet with the Russians. **5/11/2025 Because of Trump, Zelenskyy and Putin** agree to in-person meeting in Turkey**. 11/20/2025 Trump's terms for ending the war includes Russia retaining Crimea and the Russian-speaking eastern parts of the Donbas.**
25	**Before the summer 2025, the Save Act to be passed**, protecting "citizens only" voting with voter IDs, and proof of citizenship will be required for registration, and more. **1/12/2026 The Save Act will be passed by mid year 2026** or sooner.	**11/11/2024**	**1/27/25 Proof of citizenship.** Trump signs EO requiring proof of citizenship. **3/27/2025 SAVE Act coming to the floor of Congress next week. 4/10/2025 Save Act passes House.** As of **10/13/2025** Being held up by Democrats and is awaiting action. **Why we were wrong in timing:** Democrats oppose Save Act because the Act will reduce the number of ineligible ballots from non-citizens but also dead people, people who have moved, and fictious voters. However, we believe the Act will be passed, but likely in 2027 assuming the Republicans expand their Senate majority. **1/30/2026 Movement in the Senate and House to approve the Save Act, in which case this would be a "win."**
26	**No recession in 2026**	**10/25/2025**	**3/1/2026 So far, so good**. Stock market his new highs with S&P500 breaking 7,000.
27	**No stock market crash in 2026**	**10/25/2025**	**3/1/2026 So far, so good**. Stock market his new highs with S&P500 breaking 7,000. **6/2/2026 S&P500 hits a record of 7,621.**
28	**Inflation will be under control** in 2026 and range in the 1.9%-2.5% for 2026 and possibly lower in 2027.	**10/25/2025**	**2/13/2026 US January inflation (CPI) rate rose 0.2%** for the month, 2.4% annualized. 6/6/2026 (Cleveland Fed) Inflation annual CPI hit 4.02% because of Iran war. However, after peeking at $119.47 on Mar. 9th, WTI oil is now down by 38%. **6/23/2026 (TheMeyersReport.News)** Prices for June are down 14% from May.
29	**Fed Funds Rate in 2026 should fall to 3.5%**, and potentially lower by year end. 2027 should be 3.0% or lower. **5/28/2026 Fed funds rate would still be at 3.64%**, no change from today**.**	**10/25/2025 modified 5/28/2026**	**1/28/26 (Federal Reserve)** 3.50%-3.75% announced as the latest Fed target rate. **4/29/2026 Fed announces their rate to hold** at 3.5%-3.75%.
30	**Fed Monetary Policy.** Will remain relatively stable for at least the first five months of 2026.	**10/25/2025**	**1/31/2026 So far, the Fed has not loosened the money supply.**
31	**Fed Chair Powell** stays in place until the end of his term in May of 2026.	**10/25/2025**	**1/31/2026 So far, no effort is being made to remove Jerome Powell.**
32	**Money Supply will promote growth in the economy.** While it might otherwise weaken the USD, turmoil in other parts of the world will offset monetary expansion and support the USD. **Forecast is minimal to moderate change in the USD for 2026. 5/5/2026 Fed monetary policy.** The M2 measure of money will grow at a rate of 5%-6% in 2026.	**10/25/2025**	**5/1/2026 (St. Louis Fed) The U.S. (M2) money supply is growing at about 4–5%** year-over-year ending Feb. 2026, moderate expansion, not rapid monetary growth.

Note: The Meyers Report forecasts should not be considered as recommendations for any investments, purchases, or other financial use by the reader.

No	Forecast / Event / Activity	Forecast Date	Result
33	**The Fed will have** at least two more 1/4% interest rate cuts in 2026. **5/5/2026** Because of Iran, the US will likely see only one 1/4% rate cut in 2026, followed **by one more in the Q1 2027.**	**11/19/2025**	
34	**2026 GDP Real Dollar growth** should be at 2.5%-3.5%.	**10/25/2025**	**Mar. 2026 (Phil. Fed , Goldman Sachs, Kipling) 2.5%-2.8% average** Real Dollar Growth.
35	**2026 GDP Current Dollar** 4.5%-6%.	**10/25/2025**	**2/20/2026 (BLS)** U.S. current-dollar GDP (nominal GDP) rose at an annualized rate of about 5.1%.
36	**Economic warning sign. Delinquency rates for home mortgage, autos and credit cards have all been low and flat through Q3 2025. Look for an uptick in past dues in Q4 2025.** This may come in the form of consumers stretching 30-day payments to 45 days. There could be another uptick in the first quarter of 2026.	**11/19/2025**	**2/15/2026 (Mortgage Bankers Association)** reported the seasonally adjusted mortgage delinquency rate rose to about 4.26% at the end of Q4 2025, a noticeable increase from the third quarter.
37	**2026 US Employment** will increase by 0.5% to 1.0%, despite employment cuts in the public sector.	**10/25/2025**	**2/11/2026 (BLS)** US employment in January rose 0.1% (1.2% annualized) in January over December 2025. **5/8/2026 (BLS) US employment up 0.8%.**
38	**(Two forecasts) Nominal Consumer Personal Income for 2026** will increase between 5% to 6%, real income 2%-4%.	**10/25/2025**	**5/1/202 (US BEA) (1) monthly increases averaging 4.5% to 5.5%. (2) Real income is averaging 2%-4%.**
39	**Consumer Spending for 2026** should increase between 5% to 6%.	**10/25/2025**	**5/5/2026 Q4 2025 and Q1 2026, annualized Consumer Spending rose at a 6.3%.**
40	**Strategic Petroleum Reserve in 2026 will increase** to at least 431,750 million barrels, or 61% of capacity, up from 55% when President Trump took office. In the event of a Russia-Ukraine settlement, this could increase by another 2%. **5/2/2026 Forecast was adjusted,** because of the Iran war. Current high prices are allowing President Trump simeltaneously to sell off the reserve at a profit, while increasing US foreign oil sales. When the war is resolved, the replenishment will cointinue as forecast but at a lower cost.	**10/25/2025 updated 5/2/2026**	**5/3/2026 Strategic Oil Reserve (US DOE, USEIA).** Forecast held true through the Black Swan start of the Iran war. **From Oct. 25, 2025 through Jan. 30, 2026, the US SPR had increased by 1.5% which was the projected rate. 5/3/2026 Forecast was adjusted**, because the current high prices are allowing for a temporary change strategy which will resume at war's end. **5/11/2026 (US Dept. of Energy)** "The U.S. Energy Dept. (DOE) announced today the contract awards for the exchange of approximately 53.3 million barrels of crude from the Strategic Petroleum Reserve's (SPR) Bayou Choctaw, Bryan Mound, Big Hill, and West Hackberry sites. Today's announcement marks the next phase of DOE's execution of the United States' 172-million-barrel contribution to the International Energy Agency's collective action to stabilize global oil supplies."
41	**Natural Gas prices** now are at $4.24/MMBtu. In 2026 look for a cold winter and prices to hit $5.00/MMBtu in February to early April. By May, look for prices to retreat to the $4 range. **If or when there is a settlement** in the Russia-Ukraine war, gas price could fall by $1.50-$2.00/MMBtu.	**10/25/2025**	**1/23/2026 (RBN Energy) Gas hit $5.28MMBTU. 1/30/2026 (Amer. Gas Assoc.) $7.46/MMBtu. 5/1/2026 (Business Insider) Rate today is $2.79MMBTU.**

THE MEYERS REPORT Forecasts for 2026 - 2027

https://meyersreport.news/

Updated: June 25, 2026

Past forecasting results at www.meyersreport.news. Forecasts for **2026 - 2027** are updated as events occur. **Forecasting team** of subject experts listed below.

Note: The Meyers Report forecasts should not be considered as recommendations for any investments, purchases, or other financial use by the reader.

No	Forecast / Event / Activity	Forecast Date	Result
42	**Wholesale diesel rack prices** (without taxes and shipping) will fall to $1.80 to $1.60/gallon in January or February of 2026 and then rise back to $1.75 by June 30, 2026.	**10/25/2025**	**1/6/2026 (World Fuels) Diesel $1.7825.**
43	**Retail Fuel prices for Cars and Trucks. Prices** in 2026 should fall by 15¢ to 25¢ per gallon. (**10/25/2025** US average: Diesel $3.620, Regular Conventional gasoline $2.898, Reformulated gasoline $3.278.)	**10/25/2025**	**1/12/2026 (USEIA) Diesel and gasoline prices fell 16.1¢ and 25.3¢,** respectively.
44	**California refinery production to fall** by 15%-18% by July of 2026.	**10/25/2025**	**4/1/2026 (YCharts) California refinery production down 17%** from 2021.
45	**10/25/25 California gasoline price to rise.** Regular gasoline is now $4.472. (US average is $2.855.) in 2026 will rise to at least $6.50/gal. and could reach $8/gal. or more.	**10/25/2025**	**4/29/26 California regular gasoline prices averaged $5.983/gal.,** with Mono County at $6.881 being the highest in the state. **(AAA) California diesel prices hit $7.492.**
46	**Gold/oz.** to rise in 2026 to $5,000, possibly higher, based on international geo-political instability. Gold also will see upward pressure from increased industrial uses.	**10/25/2025**	**1/28/2026 Gold hit $5,400.25. 5/2026 $4,532.40**
47	**Silver/oz. to rise in 2026 to $90**, possibly higher, based on international geo-political instability.	**10/25/2025**	**1/26/2026 Price of Silver spiked to $115.50** on Iran war concerns. **1/31/26 Silver backed off to $85.25**, but is still forecast to be $90 or higher in 2026. **2/9/2026 Silver is back down $81.38. 5/5/2026 is $73.16.**
48	**2026 Copper will rise to $6.50/lb. or higher.**	**12/28/2025**	**1/29/2026 Copper hit a high of $6.20. 4/22/26 was $6.22. 5/14/2026 (Trading Economics) C**OMEX / NYMEX copper futures: about $6.58 per pound, which multiple financial sources described as a new all-time high.
49	**S&P500 in 2026 should rise to** 8,000 to 8,500.	**10/25/2025**	**4/27/26 (S&P) High hit 7,178.74. 4/30/2026 (Reuters) 7,237.85** Largest monthly gain since 11/2020. **5/14/2026 (MarketWatch) S&P500 hits new high of 7,517. 5/26/2026 (Bloomberg)** S&P500 hit 7,559.
50	**New Home Builders will offer 30-Fixed mortgage packages in the 4.9% to 4.5% range**, because they will buy down loan packages.	**10/25/2025**	**1/28/2026 (Mortgageinfo.com) 60% of builders offering rates in 4%** range buydowns. **3/15/2026 (JustPropertySearch.com)** Recent data show 80% of builders were using mortgage buydowns in January 2026. Even more striking — 55% of builders are offering rates in the 4% range, with another 20% in the low- to mid-5% range. **5/19/2026 (Chatgbpt)** 2026 evidence strongly supports the statement that new-home builders are offering 30-year fixed mortgage packages in roughly the 4.5%–4.9% range by paying lenders to buy down mortgage rates as a sales incentive.
51	**New Home Builders sales will be significantly higher** because of mortgage and other incentives and as the cost of renting increases.	**10/25/2025**	**5/5/2026 (Census.gov) March new home sales were up 7.4%** from from Feb.
52	**Home mortgage interest rates: 15-F Mortgage.** Should fall to below 5.0% and possibly fall to 4.25%.	**10/25/2025**	

THE MEYERS REPORT Forecasts for 2026 - 2027

https://meyersreport.news/

Updated: June 25, 2026

Past forecasting results at www.meyersreport.news. Forecasts for **2026 - 2027** are updated as events occur. **Forecasting team** of subject experts listed below.

Note: The Meyers Report forecasts should not be considered as recommendations for any investments, purchases, or other financial use by the reader.

No	Forecast / Event / Activity	Forecast Date	Result
53	**Coal fired Power Plants.** There will be a slowdown in closing of coal power plants, with some even being reopened to meet greater stresses on the power grid system.	**10/25/2025**	**4/13/26 (USEIA) Closure of coal-fired power plants have significantly slowed** and are being postponed. 2025 closures were the fewest in 10 years. **3/27/2026 (DW)** Chac. Merz, "W may need to keep our coal plants online longer." **3/27/2026 (Bloomberg)** German lawmakers agree to review bring back coal-fired plants back online. **6/4/2026 (WhiteHouse.Gov.)** Trump lays out plan to revitalize coal industry to increase energy creation and diversity of energy sources.
54	**Steel and heavy industry. Steel.** In January 2026, a strategic partnership will be announced between Posco (S. Korea) and Cleveland Cliffs, one of the largest vertically integrated US companies.	**10/25/2025**	**2/26/2026 (TipRanks)** Cleveland Cliffs CEO says, "We are targeting signing a definitive agreement in the first half of 2026." **4/20/2026 (Clevelands-Cliffs First quarter Report)** "Ongoing disruption in the Middle East has made Cliffs' competitive position stronger and underscores why global steel producers want to partner with Cleveland-Cliffs. While the current situation has not helped the timeline of a potential deal with POSCO, we continue to negotiate in good faith within the framework of our MoU toward a transaction that is accretive for our shareholders and fully reflects the value of our assets, our market position, and the strength of the U.S. steel demand." **5/5/2026 (SEC filings)** POSCO stated that negotiations with Cleveland-Cliffs remain active but have stalled due to significant "differences in opinions," primarily on corporate valuation, equity ownership stake, and investment size.
55	**Steel and Heavy Industry. Steel.** In 2026 and 2027, Cleveland Cliffs and US Steel make major improvements in air-cleaning systems, which will allow their production capacity to more than double. The result is that there will be more American-made steel made and sold in the US. This will make it more difficult for inferior Chinese steel to be dumped into the US market.	**10/25/2025**	**4/28/2026 (91.7 WVXU News) US Energy Dept.** gave Cleveland Cliffs $500MM for air cleaning and decarbonizing. **4/20/2026 (Clevelands-Cliffs First quarter Report)** Cliffs' Chairman, President and CEO, Lourenco Goncalves, said: "Trade enforcement in the United States is working exactly as intended, with steel imports at their lowest levels since the global financial crisis. Recent actions related to derivative products have brought needed clarity to the market, supporting manufacturing in the United States and creating new jobs for American workers." Mr. Goncalves concluded: "Ongoing disruption in the Middle East has made Cliffs' competitive position stronger and underscores why global steel producers want to partner with Cleveland-Cliffs."

THE MEYERS REPORT Forecasts for 2026 - 2027

https://meyersreport.news/

Updated: June 25, 2026

Past forecasting results at www.meyersreport.news. Forecasts for **2026 - 2027** are updated as events occur. **Forecasting team** of subject experts listed below.

Note: The Meyers Report forecasts should not be considered as recommendations for any investments, purchases, or other financial use by the reader.

No	Forecast / Event / Activity	Forecast Date	Result
56	**Heavy Industry. Oil refining.** BP Whiting is striking on February 2, 2026, unless major changes and expenditures are made. The primary issues are safety and wages.	**10/25/2025**	**February 6, 2026 (Reuters)**, roughly 98 % of the roughly 800 USW members at the Whiting refinery voted to authorize a strike due to unsatisfactory negotiations with BP. Primary issues were cutting of environmental safety and workplace protections, which the union and members cited as key issues tied to safety on the job. **3/18/2026 (The Meyers Report) BP on strike today,** with a lockout. The refinery will continue to function with a management crew on-site 24/7. No one is going in and no one is leaving.
57	**Heavy Industry. Oil refining.** In the late first quarter, BP Whiting has self-inflicted brain drain. BP will be eliminating a major portion of the maintenance staff and outsourcing these duties to a third-party. This will create a loss of in situation residual knowledge and may impact productivity and safety. How this is executed remains to be seen.	**10/25/2025**	**4/10/2026 (BP Employee Information Bulletin)** Since mid-2025 the company has been to "shift certain work from permanent BP roles to workers employed by rotating third-party contractors" **(BP workers union and The Meyers Report correspondent)** resulting in a loss of institutional knowledge. 4/28/2026 (BP Quarterly Report) Proposals included significant cuts/elimination of maintenance and environmental jobs (100-200+ positions) with outsourcing elements. This led to a contingency operation by non-union staff. The dispute centered on headcount reductions, aligning with concerns over "brain drain," knowledge loss, and potential safety/productivity impacts.
58	**Heavy Industry. Oil.** The Permian Basin continues producing with international markets and geopolitical impacts.	**10/25/2025**	**4/28/2026 Oil production in** the Permian Basin will jump 2.9%. **5/13/2026 (Reuters)Dealmaking** in the U.S. upstream oil and gas sector jumped to $38 billion in the first quarter of this year, marking the highest quarterly total in two years
59	**Data center expansions will run into problems with electric power and water access. The solutions:** Recycling water cooling systems and self-generating of electric power. There are several problems, (1) the unwillingness of design engineering firms to spend the money for what is needed for recycling and (2) the availability of power systems which simply are not available for the next 6-8 years. (3) Small nuclear power plants solve all of this problems, but availability here also is a problem. (4) Permitting processes take too long and create unnecessary additional costs, which discourage projects from being done for optimum efficiency and safety. (5) Data centers will enter into cost sharing to enable local providers to add capacity to existing plants.	**10/25/2025**	4**/9/2026 (Harvard Gazette) Public opposition is mounting over the large water and electricity demands** and other strains that data centers place on communities, according to a recent poll by the Pew Research Center. **4/20/2026 (Fortune) Half of all new electricity demand in the U.S. last year came from data centers**—just as public opinion of them plummets. **4/14/2026 (USEIA)** Multistate US, Data Center Policy meets resistance from state lawmakers. Data center growth (driven by AI) is facing major power interconnection delays (years-long queues), water consumption concerns (cooling demands stressing watersheds), and local moratoriums/restrictions in dozens of jurisdictions. Permitting/zoning stalls ~48% of projects; utilities and states cite energy/water strain. Some cost-sharing with providers and recycling discussions exist, but engineering/investment hurdles persist. Small modular nuclear is proposed as a long-term fix but faces availability, permitting, and timeline issues (not available at scale for 6-8+ years). Many projects delayed or scaled back.

THE MEYERS REPORT Forecasts for 2026 - 2027

https://meyersreport.news/

Updated: June 25, 2026

Past forecasting results at www.meyersreport.news. Forecasts for **2026 - 2027** are updated as events occur. **Forecasting team** of subject experts listed below.

Note: The Meyers Report forecasts should not be considered as recommendations for any investments, purchases, or other financial use by the reader.

No	Forecast / Event / Activity	Forecast Date	Result
60	**Venezuelan Raid and Oil and Gasoline prices.** While some are saying prices will rise, our forecast is that the impact will be minimal impact if any at all.	**1/5/2026**	**2/26/2026 WTI stayed in a forecast range top of about $65.** The Venezuelan impact on gasoline prices was negligible with Regular gasoline at less than $3.00/gallon. This changed after the attack on Iran.
61	**Price-Pork** is currently at its lowest levels at 81¢/lb. wholesale after summer highs $1.05. Expect prices to flatten and increase starting March or April of 2026.	**10/25/2025**	**5/6/2026 (Apollo Research)** Pork in Dec. through February, Dec.- stayed between 81¢ and 86¢ through January. Feb. started to rise from 86¢ to 90¢. March and April, and beginning of May the price has held at 90¢ and 92¢/lb.
62	**Price-Pork: ASF (African Swine Flu) in Spain and S. Korea** could alter this forecast and cause pork prices to rise sooner and higher in 2026. **Update: 5/19/2026 Pork is now 98¢/lb. wholesale.** Look for prices to hit $1.115 to $1.20 this summer.	**10/25/2025**	**5/6/2026 (Apollo Research)**There was an outbreak of ASF in S. Korea and Spain, but has not been severe to alter demand in the US. **5/19/2026 (USDA) Forecast o**n track. Wholesale pork prices rose from lows and have continued climbing through spring into early summer. **Basis and latest data:** Prices reached 98¢/lb by early May per forecaster update; ongoing upward pressure.
63	**Price-Beef wholesale prices are very high**, but have corrected from highs of $244/cwt. due to Trump intervention and then backed to $226/cwt. In 2026 expect prices to increase and make new highs.	**10/25/2025**	**4/29/2026 (Apollo Research)** Prices hit a high of $255. **5/6/26 (American Farm Bureau)** (2) Currently the US beef herd is at a 70-year low, the lowest since 1951.
64	**Price-Beef wholesale prices** In 2026 expect prices to increase and make new highs, in part because the is a 70-year low in beef supply. Any price increase could be exacerbated if beef Screw Worm spreads in Mexico.	**10/25/2025**	**May 19, 2026: Strongly on track. (USDA)** U.S. cattle herd at ~70-year lows; New World Screwworm in Mexico has halted imports, tightening supply further and pushing prices higher.Basis and latest data: Screwworm-related border closures since May 2025 continue; record-high cattle/beef prices.
65	**Price-Chicken Broilers.** Currently broilers are at $3.68 a pound wholesale. Price increases will be driven by strong domestic demand, high prices for competing meats like beef, and favorable feed costs.	**10/25/2025**	**4/30/2026 Wholesale price is $1.76/lb.,** with retail prices at $5-$7/lb. **5/19/2026 (USDA) On track.** Broiler prices have seen upward pressure from demand and competing meat prices, though production increases have moderated gains. Basis and latest data: Wholesale broiler prices elevated but volatile.
66	**Price-Chicken Broilers. Bird flu is still in the area** with commercial operations as of September and October, respectively, amounting to a combined culling of 7.61 million affected birds. This could cause prices to rise yet in 2025 and early 2026. This is expected to occur despite an increase in production.	**10/25/2025**	**5/19/2026 (USDA) On track.** The battle with Bird Flu caused the current price elevation. Ongoing avian influenza pressure and prior culls contributed to price firmness into 2026 despite overall production growth. Basis and latest data: HPAI outbreaks and culls continued into 2026.
67	**Price-Boneless Chicken Breasts.** Look for chicken breast to sell for about $4 dollars/lb.at retail. For 2026, boneless chicken breast prices are expected to see a moderate increase, driven by factors such as resilient consumer demand for affordable protein and lower feed costs for producers. However, potential production increases and market volatility from factors like avian influenza could influence the final price.	**10/25/2025**	**5/6/2026 (USDA) Retail is averaging between $4.16** so far in 2026. **5/19/2026 (USDA) On track.** Retail boneless breasts around or above $4/lb with moderate increases from demand and volatility. Basis and latest data: Retail poultry tracking shows firmness.

THE MEYERS REPORT Forecasts for 2026 - 2027

Updated: June 25, 2026

Past forecasting results at www.meyersreport.news. Forecasts for **2026 - 2027** are updated as events occur. **Forecasting team** of subject experts listed below.

Note: The Meyers Report forecasts should not be considered as recommendations for any investments, purchases, or other financial use by the reader.

No	Forecast / Event / Activity	Forecast Date	Result
68	**Price-Corn** has been pushing higher per bushel reaching $4.35-$4.45 in the next few weeks. However, expecting a bumper crop and will have prices level off soon thereafter. While a price retreat is possible, loosening tariff deals should increase export demand and keep prices stable. This should be a good year for farmers. **5/6/2026 Prices to stay elevated until fertilizer and gasoline prices come down.**	**10/25/2025**	**11/30/2025 (Apollo Research)** Corn stayed in a range of $4.35 to $4.55 through Jan. 9, 2026. 1/12/2026 Because of a bumper crop, corn prices fell to $4.20. Since then, demand and prices started to rise, with prices now **(5/4/2026) (CBOT)** at $4.85. **5/19/2026 (USDA) On track.** Corn prices have stayed elevated longer than initial bumper-crop expectations due to export demand and input costs; May 6 update holds. Basis and latest data: Prices around $4.60–$4.80 range with firmness.
69	**Price-Wheat.** October 2025, wheat prices are hovering around $5.20 to $5.30 per bushel for hard red winter and soft red winter futures. December contract price is approximately $5.23 per bushel. In 2026, look for wheat prices to remain steady in 2026 because of a record global harvest, despite a softening in 2025.	**10/25/2025**	**5/6/2026 (Apollo Research) World wheat is $5.35/bu.**, as forecast. However, a winter drought in the US pushed US prices up to $6.20-$6.80/bu., a 22-month high. **5/19/2026 (USDA)** Global harvest supportive but weather/export factors have kept prices firm. Basis and latest data: Futures around $5.50–$6+ range.
70	**Price-Soybeans** have moved up higher to $7.55 a bushel with China demand resuming. China will buy at least 12 million metric tons by January of 2026 for delivery between now and the next five to six months. For the second half of 2026, look for China to buy another 25 million tons. Look for soybean prices to $7.50/bu. to $7.90/bu. in the 2nd half of 2026. **5/6/2026 Look for China 25MM tons by 2028.**	**10/25/2025**	**1/27/2026 (Farm Progress and Reuters)** China bought 12 metric tons by the end of January. **5/19/2026 (USDA) On track.** China demand strong with major purchase commitments announced (including $17B ag deal elements); prices higher than narrow range but directionally supportive; 2028 extension noted in updates. Basis and latest data: China committed to large U.S. ag purchases (including soybeans) in 2026–2028.
71	**African Swine Flu (ASF)** Look for flareups of ASF in Spain to cause a pork shortage over the next six months.	**12/1/2025**	1/30226 (DeaconBio.org) In Spain, 23 outbreaks and 123 positive cases of ASF. **3/25/26 (PigProgress.net) 148,000 pigs culled because of ASF. It is likely that it will bass the 300,000 mark. 4/7/2026 (SwineHaelth.org) 5/19/2026 ((WOAH) Accurate/on track.** ASF outbreaks in Spain (first in 31 years, detected late 2025 and expanding in 2026) have triggered culls, export bans (e.g., from UK, China, Japan, Philippines), and regional supply disruptions, contributing to tighter EU/global pork availability. Basis and latest data: Outbreaks primarily in wild boar near Barcelona with biosecurity measures expanded; no widespread domestic pig farm infections yet, but trade impacts and shortages materialized.
72	**African Swine Flu (ASF)** Look for flareups of ASF in S. Korea to cause a pork shortage over the next six months.	**12/1/2025**	**1/30226 (DeaconBio.org) In South Korea, 20** ASF outbreaks in seven provinces and 280 confirmed cases in Spain. **5/19/2026 (South Korea MAFRA) Accurate/on track.** South Korea reported multiple ASF outbreaks in early 2026 (at least 8 confirmed cases by February, with ~148,000–150,000 pigs culled in Q1), leading to feed destruction, movement restrictions, and supply pressure. Basis and latest data: Outbreaks across multiple provinces; culls significantly higher than 2025 totals, tightening domestic and export supply.

THE MEYERS REPORT Forecasts for 2026 - 2027

https://meyersreport.news/

Updated: June 25, 2026

Past forecasting results at www.meyersreport.news. Forecasts for **2026 - 2027** are updated as events occur. **Forecasting team** of subject experts listed below.

Note: The Meyers Report forecasts should not be considered as recommendations for any investments, purchases, or other financial use by the reader.

No	Forecast / Event / Activity	Forecast Date	Result
73	**Pork Prices**. Look for pork prices to rise between now and the summer of 2026. Look for June wholesale prices to hit on or about $108/cwt.	**12/1/2025**	**5/6/2026 (Apollo Research) Pork hit $112.02 in February 2026** and currently trading at about $100/cwt.. **5/19/2026 (USDA, CME Lean Hog Futures) On Track.** Wholesale pork/lean hog prices have risen steadily from earlier 2026 lows and are approaching or trading in the $100–$108+/cwt range for summer contracts, supported by ASF impacts, tight supply, and demand. Basis and latest data: June 2026 lean hog futures around $102–$104/cwt (as of mid-May), with upward momentum toward the $108 target; carcass cutouts and wholesale values firming.
74	**In 2026, Messenger RNA cancer vaccines** still will be pushed and be dangerous.	**10/25/2025**	**6/1/2026 (Clinical Trials.gov)** Actively advancing in clinical trials being "pushed" in research. Multiple Phase 2/3 mRNA cancer vaccine trials remain active and recruiting on ClinicalTrials.gov (e.g., NCT05968326 and related melanoma/other cancer studies). No official FDA/CDC designation of these investigational vaccines as "dangerous" appears in regulatory data. The public is unconvinced that mNRA vaccines are safe, A March 2026 Politico Poll Survey of 3,851 U.S. adults showed A plurality (46%) agreed that "the facts on vaccines are still up for debate and it is damaging to enforce their uptake," compared to 39% who said "the science on vaccines is clear and it is damaging to question it." Increased public skepticism may cause increased rigor in testing.
75	**In 2026, Ivermectin will become a more widely accepted** treatment for Covid and other viral respiratory treatments and be used for advancement in cancer treatments.	**10/25/2025**	**3/2/2026 (NPR) Ivermectin for cancer treatment** is making post-pandemic comeback. **3/24/2026 (Social Insights) "ivermectin shows no clinically meaningful benefit** in recovery, hospitalization, or mortality. **3/30/2026 (Springer Nature Link)** A major 2026 systematic review of 40 randomized controlled trials (23,000+ patients) found: "No statistically significant difference in mortality or clinical outcomes" for ivermectin in COVID-19 treatment or prevention. **5/29/2026 While TMR believe the opposite,** majority public opinion is not there yet.
76	**Covid vaccine damage will become clearer in 2026** and will result to challenges to the protections afforded to vaccine makers.	**10/25/2025**	**2/17/2026 (Hultquist Law) Senators Rand Paul and Mike Lee** porpose the **"End the Vaccine Carveout Act"** The legislation seeks to reform the structure of the National Vaccine Injury Compensation Program, and allow civil suits against manufacturers. **5/13/2026 (NY Post) Prescriptions for controversial drug shot up** 250% for cancer patients.
77	**Trans-sexual self-identification** which has been increasing during the Biden administration, will decline dramatically from 2025 through 2028.	**10/25/2025**	**4/7/2026 (SSRN and Eric Kaufman, Univ. of Buckingham)** The Decline of Trans and Queer Identity among Young Americans has fallen from 7% in 2023 to less than 4%.

Note: The Meyers Report forecasts should not be considered as recommendations for any investments, purchases, or other financial use by the reader.

No	Forecast / Event / Activity	Forecast Date	Result
78	**Trans-sexual professional diagnoses** will hold steady for 2026 and then decline in 2027 (or sooner) as political winds, laws, and professional liability change.	**10/25/2025**	**5/6/2026 (General Psychiatry) Some 2025–2026 surveys and analyses suggest** the growth in transgender identification and related clinical diagnoses may be stabilizing in 2026, with the possibility of declines beginning in 2027 or later, though definitive nationwide diagnostic data for 2027 are not yet available.
79	**Robert F. Kennedy. Jr. will obtain congressional approval to create the administration** for a healthy America and return the CDC to original purpose, which was to control and prevent the spread of malaria and other communicable diseases throughout the United States.	**11/4/2025**	**5/5/2026 (Axios) In 2026, Health Secretary Robert F. Kennedy Jr. advanced a proposal** to create the "Administration for a Healthy America" as part of a broader restructuring of HHS under the MAHA initiative. The proposal was included in budget and reorganization plans but faced congressional resistance and legal challenges, and it had not been fully established as a standalone federally authorized agency through congressional legislation."
80	**Blocked use of Ivermectin and Hydroxychloroquine** for Covid treatment. Documentation will come out in 2026 and 2027 that blocking those drugs was necessary to allow the emergency use authorization of the Covid vaccines. Procedures required that these drugs be blocked by the FDA for the primary purpose of allowing the emergency use Covid vaccines. By the end of 2026, expect as many as 14 states allowing "over-the-counter" sale of Ivermectin.	**11/3/2025**	**4/3/2026 (Factually) As of April five states (TN, AR, ID, LA, TX) allow over the counter sales** of Ivermectin, with three more (MS, SC, OK) having pending legislation. Plus Amazon is selling Ivermectin in other states as well. **5/20/206 Iowa now allows OTC Ivermectin as part of their new MAHA health policy bill.** All six states are Republican states. **Eight other states** have introduced similar bills. At this time no state allows OTC sales of Hydroxychloroquine.
81	**Skin substitutes**. Because of medical abuse, federal health plans will remove or limit coverage for skin substitutes.	**11/3/2025**	**1/1/2026 (Ambulatory Surgical Center Payment Update)** On Track Although still covered by Medicare, most skin substitutes are now paid at $127.14 per square centimeter (some rates previously exceeses $2,000). Providers face heightened security . Audits, and documentation requirements.
82	**Kidney transplant wait items.** An artificial kidney will be entered into phase four field trials and possibly the marketplace by 2028.	**11/3/2025**	**5/25/2026 Too soon to tell**

Updated: June 25, 2026

Past forecasting results at www.meyersreport.news. Forecasts for **2026 - 2027** are updated as events occur. **Forecasting team** of subject experts listed below.

Note: The Meyers Report forecasts should not be considered as recommendations for any investments, purchases, or other financial use by the reader.

No	Forecast / Event / Activity	Forecast Date	Result
83	**Cancer treatment. In 2026,** the term theragnostic (precision diagnostics + precision therapy) will become more mainstream. A drug type that will be going mainstream is "radiopharmaceutical," which is an injectable radioactive drug that deposits trace amounts of radiation on precise targets. **These treatments have and will continue to eliminate the need for chemo in treating cancer.** These improvements are available now at prestigious Academic Medical Centers, and will take ~5 years to truly scale, but we will be hearing about them in the next year.	**11/3/2025**	**5/25/2026 (Medical College of Wisconsin and others) On Track (1) "Theragnostic" (theranostics) becoming more mainstream** in 2026. Fully on track. The field has dedicated 2026 conferences **(e.g., Gordon Research Conference on Radionuclide Theranostics, PSMA and Beyond 2026, SNMMI Theranostics events)**, updated clinical guidelines (e.g., Carelon's revised Theranostics criteria effective April 2026), and frequent expert coverage framing it as "the next wave" or "redefining cancer treatment." **(2) Radiopharmaceuticals (injectable radioactive drugs depositing trace radiation on precise targets) going mainstream.** Strongly on track and actively expanding. These are exactly as described: targeted radioligand therapies (e.g., Lu-177-PSMA-617/Pluvicto for prostate cancer; Lu-177-DOTATATE/Lutathera for neuroendocrine tumors) that deliver localized radiation while sparing healthy tissue. **(3) These treatments have and will continue to eliminate the need for chemo.** Partially realized / directionally accurate but overstated. Radiopharmaceuticals are increasingly used earlier in treatment paradigms—sometimes preceding chemotherapy—with studies (e.g., PSMAfore, PSMA Addition) showing better outcomes and fewer side effects in certain settings.(5) We will be hearing about them in the next year (2026). Fully realized. 2026 has seen a clear uptick in coverage: conferences, AACR/I CR forecasts highlighting radiopharmaceuticals as a key advance, clinical program expansions, and investment news.

Past forecasting results at www.meyersreport.news. Forecasts for **2026 - 2027** are updated as events occur. **Forecasting team** of subject experts listed below.

Note: The Meyers Report forecasts should not be considered as recommendations for any investments, purchases, or other financial use by the reader.

No	Forecast / Event / Activity	Forecast Date	Result
84	**Alzheimer's in 2026, 2027.** Look for breakthroughs in applying theragnostic to Alzheimer's diagnosis and treatment. Also, Alzheimer's drugs Lakemba and Kisunla will be shown to have greater efficacy, particularly when combined with new precise scanning techniques. They will start research on humans in 2026.	**11/3/2025**	**5/5/2026 (Alzheimers Disease Research and others) On track. (1) Breakthroughs in applying theragnostic** (theranostics) to Alzheimer's diagnosis and treatment. Emerging but not breakthrough-level yet. The concept of "neurotheranostics" gained discussion in 2025 (amyloid/tau PET diagnostics paired with anti-amyloid monoclonal antibodies as the therapeutic arm), and preclinical work continues on fluorescent NIRF/small-molecule theranostic probes targeting Aβ plaques and cholinesterases (e.g., dual imaging + inhibitory activity in mouse models) **(2) Alzheimer's drugs Lakemba (Lecanemab/Leqembi) and Kisunla (donanemab) will be shown to have greater efficacy**, particularly when combined with new precise scanning techniques.Partially realized / on track with refinements. Both drugs (anti-amyloid monoclonal antibodies) were approved earlier (Leqembi 2023; Kisunla 2024) and slow cognitive decline in early-stage Alzheimer's (mild cognitive impairment or mild dementia). **(3) They will start research on humans in 2026.** Not realized for theranostics. Broader Alzheimer's pipeline includes many 2026-readout trials (e.g., trontinemab, remternetug), but not theranostics.
85	**WHO Pandemic Treaty.** The US will remain out of the WHO , despite increased efforts to get the US to opt in.	**11/3/2025**	**1/22/2026 (CDC) The U.S. formally completed its withdrawal from the WHO.**

Updated: June 25, 2026

Past forecasting results at www.meyersreport.news. Forecasts for **2026 - 2027** are updated as events occur. **Forecasting team** of subject experts listed below.

Note: The Meyers Report forecasts should not be considered as recommendations for any investments, purchases, or other financial use by the reader.

No	Forecast / Event / Activity	Forecast Date	Result
86	**Abortion alternatives**. One or more major organizations will pivot from a strictly "moral" rationale against abortion to one that also looks at economics. The new position(s) will include that (1) abortions are an inefficient means of birth control, (2) that developed nations either have or are approaching birth rates which are too low to prevent population decline and thus sustain their economies.	**11/12/2025**	**5/25/2026 (Population Connection and others) Part 1: One or more major organizations will pivot from a strictly "moral" rationale against abortion to one that also looks at economics. Partially realized / trend visible.** Economic and demographic (pronatalist) arguments have gained significant traction as supplementary rationales within the broader conservative ecosystem. Examples include: Trump administration officials (RFK Jr., Mehmet Oz) and Trump himself framing low fertility as a "crisis" at a May 2026 maternal health event, tying it to family/fertility policy. Overlap with pronatalist think-tank and policy work (e.g., Heritage Foundation, Americans United for Life's longstanding "Make Birth Free" economic framing). **Part 2: The new position(s) will include that abortions are an inefficient means of birth control.** Not Yet. Part 3: Developed nations either have or are approaching birth rates which are too low to prevent population decline and thus sustain their economies.Fully realized and widely discussed. U.S. and developed-nation fertility rates remain well below the replacement level of ~2.1: U.S. fertility hit a record low of ~1.6 births per woman in 2024–2025 data, with projections indicating potential population decline absent immigration changes.
87	**Hundreds of thousands, possibly million+, of jobs to leave beginning in 2026** and continuing through 2028**, because of the new Mayor of New York. The city will lose major financial institution jobs** to Texas, Tennessee, Florida, and other pro-business states. These include the NYSE, Goldman Sachs, Morgan Stanley, Citigroup, and others. For a while, these companies may keep token HQ offices in the city, but they will move masses of jobs away over the next two-three years.	**11/5/2025**	**5/11/2026 (NY Post) Many NY firms are expanding operations to Texas and Florida** for lower taxes and lower operating costs, including Citadel, Apollo Global Management, JPMorgan Chase, and Goldman Sachs. **5/6/2026 (Fox News)** Ken Griffin vows to "double down' on Miami move, says NYC 'doesn't welcome success."
88	**Other jobs to go.** The loss of financial institution workers will hurt the support businesses which financial workers relied upon, everything from restaurants to shops, and the apartments the workers live in, and the repairmen, plumbers and the ripple effect will go on.	**11/5/2025**	**2/17/2026 (NY Post) Partnership for the City of New York** found that Texas has been gaining jobs that historically would have been concentrated in New York. The report warned that proposed NYC corporate tax increases would worsen the trend because Texas has no corporate income tax and substantially lower business costs. **4/1/2026 (TimeTrex)** Texas has surpassed New York in financial-services employment growth.Firms including Citadel, Apollo, and other investment companies have expanded operations in Florida and Texas. **5/11/2026 (NY Post)** Texas has surpassed New York in financial-services employment growth.

Note: The Meyers Report forecasts should not be considered as recommendations for any investments, purchases, or other financial use by the reader.

No	Forecast / Event / Activity	Forecast Date	Result
89	**Further decline in NYPD.** Crime will not get better, though the mayor will try to cook the books. The new Mayor has declared an intention to eliminate the NYPD anti-terrorist unit. The NYPD morale will plummet further and the trained cops will leave for more friendly climate changes.	**11/5/2025**	**3/18/2026 (Gothamist)** NYPD commissioner Tisch changed how it publicly reports hate crimes, drawing sharp backlash from experts and advocates who warned that the lower confirmed numbers could obscure the data and make crime trends appear artificially low. **3/22/2026 (NY Post) More than half of the NYPD's "Joint Terrorism Task Force cops** can retire right now, along with thousands of sergeants, lieutenants, and captains, worrying officials about the future of terror and crime fighting in Gotham." "Police are concerned that the thousands of veteran NYPD bosses and gumshoes will flee..." "Union officials warned that thousands of veteran officers eligible for pensions could leave." **4/10/2026 (NY1 TV)** Even after the (failed) ISIS-inspired bomb attack on protesters near Gracie Mansion, Mamdani remains committed to disbanding the SRG (anti-terrorist unit.)
90	**Food deserts. Because of the higher crime levels and city-run grocery stores**, food deserts will occur particularly in the poorer neighborhoods which already are suffering.	**11/5/2025**	**1/26/2026 (Bloomberg) Amazon announced in January 2026** that it would close multiple stores in New York. **4/10/2026 (National Today) Rite Aid closed all 178 New York locations** by end of 2026. While not a supermarket chain, many locations sold groceries and convenience food items, particularly in underserved urban neighborhoods. **5/13/2026 (NY Post) Immigrant-led business group builds $1M war chest** to fend off Mamdani's NYC-owned supermarkets, which are budgeted to lose money in perpetuity..
91	**Local universities based in NYC may become untenable,** because of higher crime, higher costs, and reduced living services and standards and no police.	**11/5/2025**	**5/25/2026 Too soon to tell.**
92	**Terror attack. NYC is now more vulnerable to a terrorist attack** and it will get worse progressively.	**11/5/2025**	**3/7/2026 (DOJ and FBI) Terror attack with IEDs by Gracie Mansion** (failed to detonate.) and more planed.
93	**New NYC to become Detroit?** The process will become noticeable in 2026-2028.	**11/5/2025**	**3/27/2026. (Comptroller.NYC.gov) Trending**--"Three of the four rating agencies that evaluate New York City's General Obligation bonds have revised the City's outlook from stable to negative." Credit rating decline preceded Detroit's bankruptcy.
94	**Truckers to boycott deliveries to NYC. In 2026, there will be trucker drivers who will refuse to make deliveries and pickups in NYC.**	**11/5/2025**	

THE MEYERS REPORT Forecasts for 2026 - 2027

Updated: June 25, 2026

Past forecasting results at www.meyersreport.news. Forecasts for **2026 - 2027** are updated as events occur. **Forecasting team** of subject experts listed below.

Note: The Meyers Report forecasts should not be considered as recommendations for any investments, purchases, or other financial use by the reader.

No	Forecast / Event / Activity	Forecast Date	Result
95	**New NYC to become wake-up call for the rest of the nation** over the next three years, which will invigorate Conservatives and create converts.	**11/5/2025**	**5/28/2026 Front PageMagazine) Mamdani announced that he was going to seize rental properties from landlords** who have not maintained them properly, and hand over ownership not to the city government, but to supposedly impartial players and fair dealers such as "community land trusts" and "non-profits." "we will work to transfer ownership to responsible stewards. Stewards that include community land trusts, non-profits, or even the tenants themselves."
96	**Winter weather.** Through remainder of winter, while there will be ups and downs in temperatures, expect significant chances for more Arctic outbreaks of cold, especially for the Northern Plains, Upper Midwest, Great Lakes and New England. Occasional pushes of cold to the Gulf Coast region will be possible.	**12/24/2025**	**Status 5/20/2026 (NOAA Climate Prediction Center and Weather.gov) Accurate.** The 2025–2026 winter featured several notable Arctic outbreaks and cold snaps affecting the Northern Plains, Upper Midwest, Great Lakes, and New England, including a major winter storm in late January 2026 with heavy snow and ice. Basis and latest data: Multiple Arctic blasts occurred, but La Niña influences led to regional variability.
97	**Spring-Summer:** With current La Nina pattern fading in the Pacific and a neutral ENSO (El Niño-Southern Oscillation) phase or a weak El Nino developing by summer, there is no strong signal that widespread drought will be a concern in the USA this summer. **Crop yields.** The weakening La Nina also will have minimal impacts on crop production in South America. Therefore, weather will not likely have a large impact on yields in 2027. For Europe, Asia and Australia near average yields expected as well.	**12/24/2025**	**Status 5/20/2026 (NOAA Climate Prediction Center and AgWeb 2026 weather outlooks) Accurate.** La Niña faded quickly into neutral/early El Niño conditions by spring 2026, resulting in no widespread U.S. drought concerns for summer. Crop yields have been near average with minimal ENSO-driven disruptions; similar patterns held for South America, Europe, Asia, and Australia. Basis and latest data: Rapid transition to neutral ENSO confirmed; favorable planting and and yield conditions reported.
98	**Hurricane season:** initial indications suggest a near average to slightly below average hurricane season in the USA, this is after the USA avoided a landfalling hurricane in 2025.	**12/24/2025**	**Status as of May 20, 2026 (NOAA and CSU) Accurate so far.** Pre-season forecasts **(CSU, TSR, NOAA)** called for near-average to below-average activity. The 2026 season (ongoing as of May) aligns with this outlook. Basis and latest data: Early forecasts projected 12–15 named storms, 6 hurricanes, 2 major; no major U.S. landfalls yet.

Note: The Meyers Report forecasts should not be considered as recommendations for any investments, purchases, or other financial use by the reader.

No	Forecast / Event / Activity	Forecast Date	Result
99	**Climate:** During 2026 and 2027, despite declining interest and politicians (at least in the USA) not mentioning "climate doom" nearly as much, the climate change narratives of impending doom will continue. The main source will be NGO's and other environmental groups which still have plenty of dollars left to spin "doom" narratives to a willingly gullible news media, which who continue producing new stories and narratives of climate catastrophe. While the narratives and fading and predictions continue to fail, the climate doomers still will have enough $$ and political clout to impact policy making, despite the gains of the Trump Administration to pull off the false veil of the climate doom messaging. The end of the climate hoax is coming, but it will be awhile.	**12/24/2025**	**Status 5/20/2026) (Sierra Club, Various environmental group reports and media analysis) Accurate.** Climate doom narratives persist strongly from NGOs and media despite reduced emphasis from U.S. politicians under the Trump administration. Basis and latest data: Ongoing NGO campaigns and media coverage continue unabated.
100	**Hoax fails.** In 2026, expect more to come out about shoddy scientific and economic studies in regards to climate change impacts, similar to the study that was retracted in Nature in regards to climate risk and insurance rates.	**12/24/2025**	**Status 5/20/2026 (Retraction Watch and Nature notices (2025–2026) Accurate.** Multiple retractions and scrutiny of climate impact studies occurred in 2026, including high-profile economic projections. Basis and latest data: Retractions of influential papers on climate costs.
101	**Climate scandal:** In 2026, yet another major scientific journal will retract a study on the amount of predicted exaggerated sea level rises.	**1/5/2026**	**5/20/2026 (Washington Post) "Researchers finally retire the most extreme scenarios** that have informed policy and media coverage for years." RCP8.5, SSP5-8.5, and SSP3-7.0 The report said that the doomsday scenarios were not going to happen and were impossible.
102	**Terrorist cells identified. In 2026 and 2027**, it will come out that ICE and the FBI quietly have been rooting out terror cells which are manned, trained, armed and financed by the CCP (Chinese Communist Party), the cartels, Muslim jihadists, and George Soros-type nihilists.	**10/1/2025**	**Status 5/20/2026 (DHS National Terrorism Advisory (2026)). On track.** Arrests of individuals with potential infrastructure targeting plots reported; no successful major "Black Swan" attacks yet. Basis and latest data: DHS/FBI threat assessments note ongoing risks and thwarted attempts.
103	**Terrorist cells in US are here now. In 2026 and 2027.** There will be attempts on our infrastructure, which if they are successful, could be a full-grown Black Swan.	**10/1/2025**	**Status 5/20/2026 (DHS National Terrorism Advisory (2026) On track.** Arrests of individuals with potential infrastructure targeting plots reported; no successful major "Black Swan" attacks yet. Basis and latest data: DHS/FBI threat assessments note ongoing risks and thwarted attempts.
104	**Terrorist attack in US threat level high.** The only defense is US anti-terrorist counter-intelligence, which has to be perfect. The bad guys only have to be successful once.	**10/1/2025**	**Status 5/20/2026 (DHS NTAS updates 2026) Accurate.** U.S. threat level remains elevated with emphasis on counter-intelligence. Basis and latest data: Ongoing DHS/FBI warnings.

THE MEYERS REPORT Forecasts for 2026 - 2027

Note: The Meyers Report forecasts should not be considered as recommendations for any investments, purchases, or other financial use by the reader.

No	Forecast / Event / Activity	Forecast Date	Result
105	**(Two forecasts) (1) North Korea** will be quiet 2026 and 2027 as long as Trump remains in office and **(2)** Sino-US relations do not disintegrate too much.	**10/1/2025**	**5/7/2026 (Armscontrolcenter.org) On or about Jan. 27 North Korea launched** multiple ballistic missiles from the vicinity of Pyongyang into the East Sea, marking its first missile launch of the year, since then nothing. **5/1/2026 (WEF)** There has been no significant change in Sino-US relations. 5/2026 (U.S. State Department and news briefings) Accurate so far. North Korea has been relatively restrained with limited provocations amid ongoing U.S. diplomacy.
106	**Antifa.** In 2026, it will come out that Antifa is a violence-based Communist organization that originated as far back at the 1930 in the violent support of Communism versus Fascism.	**10/1/2025**	**Status 5/20/2026 (Gallup and media analyses) Accurate so far.** Debates and incidents of protest-related violence from leftist groups continue amid political polarization. Basis and latest data: Polling and protest reporting show persistent tensions.
107	**US Leftist/Progressive movement.** Leftist acceptance of violence will continue increasing in 2026 as the nation swings more conservative. If this gets out of control insurrection violence will come from the left, not conservatives.	**10/1/2025**	**Status 5/20/2026 (Gallup and media analyses) Accurate so far**/ongoing. Debates and incidents of protest-related violence from leftist groups continue amid political polarization. Basis and latest data: Polling and protest reporting show persistent tensions.
108	**Genocide, an abused and distorted term in US politics,** The political intended over- and miss-use of the term genocide will be made clearer to the public by the end of 2027 or sooner. This will be made clearer with exposure by greater coverage of Nigerian real genocide of Christians slaughtered by Boko Haram, and the Uyghurs (Muslims) by the Chinese.	**11/1/2025**	**5/11/2026 (USCIRF report) Recommended** that the U.S. Department of State redesignate China as a Country of Particular Concern (CPC). **5/20/2026 (US State Dept. and US Congressional Human Rights Report) Increased U.S. political and media discussion of global genocides** (Uyghurs, Nigerian Christians) has highlighted selective use of the term. Basis and latest data: Congressional hearings and reports on these issues.
109	**Reform of voter registration, voting and counting** procedures will be a hot topic for 2026 and 2027.	**11/1/2025**	
110	**"World coming to an end. Send money."** Over the next 90 days, research studies and news stories about pending disasters will surface. Reason: The Federal government grant season has begun.	**11/1/2025**	
111	**Deportation employment. Alongside expanded federal hiring** (already underway), the government will increasingly rely on defense-contracting firms to construct holding/ processing facilities, manage transport logistics, and support mass deportation operations.	**11/1/2025**	
112	**Election fraud prosecutions**. Once unheard of, more prosecutions for election tampering and political perjury will make the news.	**9/19/2025**	

THE MEYERS REPORT Forecasts for 2026 - 2027

https://meyersreport.news/

Updated: June 25, 2026

Note: The Meyers Report forecasts should not be considered as recommendations for any investments, purchases, or other financial use by the reader.

No	Forecast / Event / Activity	Forecast Date	Result
113	**(1) Voter rolls verification will grow in 2026** to reduce illegal registrations. **(2) States will be found to have dead, moved, ineligible, and illegal** people registered in the hundreds of thousands. **(3) The federal government will oversee voter roll maintenance** and will provide removal lists to States. **(4) States who do not comply will be sued.**	**9/19/2025**	**3/11/2026 (Daily Signal) DOJ review of voter roles in 16 states** found hundreds of thousands of dead and tens of thousands of illegals. **4/28/2026 (Nat. Conference of State Legislatures) 30 states have sued in Federal** court. Six have been dismissed.
114	**Ranked Choice Voting (RCV)**, in 2026 and beyond, will be reduced.	**9/19/2025**	
115	**Election rules upgrades.** Based on The Meyers Report Election Rules Survey of September, 2025, states with the lowest scores will implement changes to raise their scores.	**9/19/2025**	
116	**Election touchscreen machines.** In 2026 and beyond, "election machines" will be under greater scrutiny and decline in use, because of their high risk. The federal government will ban all election equipment that does not meet FIPS 200 (essentially all equipment). However, most communities still using the machines will not comply, thereby theoretically invalidating those machines for use in federal elections and set up court challenges which could impact election reporting and results.	**9/19/2025**	
117	**By 2028 or sooner, Election reforms, Voting Machines.** Voting machines will be clearly identified as hackable and will be eliminated either by state law or regulation, or federal technical requirements for certifications for federal elections.	**11/4/2025**	
118	**US Supreme Court and redistricting.** In Clay vs. Louisiana, US Supreme Court will rule that race-based voting district boundaries are unconstitutional.	**10/1/2025**	**4/29/2026 (SCOTUSBlog)** In major Voting Rights Act case, Supreme Court strikes down redistricting map challenged as racially discriminatory.
119	**Mood of Country.** The nation will move toward center and right and be seen in election results, regulations, and laws on the federal and state levels.	**10/1/2025**	
120	**CNN moves to center and then Right by end of 2027,** possibly sooner. Staff changes will occur with the news people, but first in management and sales staff.	**10/2/2025**	
121	**Other media will follow CNN as it moves to center and then Right by end of 2027,** possibly sooner. Staff changes will occur as the news people, but first in management and sales staff.	**10/2/2025**

Note: The Meyers Report forecasts should not be considered as recommendations for any investments, purchases, or other financial use by the reader.

No	Forecast / Event / Activity	Forecast Date	Result
122	**The Washington Post** also will move to the center and the Right in 2026 and 2027.	**10/2/2025**	
123	**Violent protests.** As the Left loses ground, violence will become more of an acceptable form of Leftist expression. Then the proof of professional demonstrators, agitators, and their funding sources will come out. Look for RICO and other prosecutions possibly in 2026, but more likely 2027.	**10/2/2025**	**1/30/2026 (ABCNews)** Crowds of protesters have taken to the street amid the call for action, with demonstrations and school walkouts occurring in Minneapolis, as well as cities including Los Angeles, San Francisco and New York City. Some are taking place amid prolonged frigid temperatures. **4/25/2026 (CNN, CBS)** There was a shooter White House Correspondents Dinner.
124	**Texas will stay "red" for the mid-terms and in 2028,** despite Democrat claims otherwise.	**10/2/2025**	
125	**By 2028, Census Bureau will be distinguishing** citizens from non-citizens to be used allocating Congressional representation.	**10/2/2025**	
126	**Citizens only. By 2028, most states will use Census data to insure that only US citizens will determine** redistricting maps and State Congressional representatives.	**10/2/2025**	**3/31/2026 (WhiteHouse.gov.)** An EO was signed, "The right to vote in federal elections is reserved exclusively to citizens of the United States under the Constitution and Federal law."
127	**Criminal indictments. In 2026 and beyond, RICO charges** will be brought against organizations which sponsored/funded other organizations which used cancellation and physical intimidation against political opponents.	**10/2/2025**	**1/8/2026 (Just the News)** Kash Patel told Just the News on Thursday that his agents are investigating the organizers and funders of anti-immigration enforcement protests for impeding law enforcement activities and endangering public safety. **2/27/2026 (Attorney General Pam Bondi, DOJ)** Announced federal charges against 30 more people accused of civil rights violations in a January protest inside a Minnesota church where a pastor works for Immigration and Customs Enforcement. **3/7/2026 (ABC News)** Two Pennsylvania men Emir Balat of Langhorne and Ibrahim Kayumi of Newton arrested outside the residence of New York City Mayor Zohran Mamdani during a counterprotest on Saturday told investigators they watched ISIS videos and confronted the far-right, anti-immigrant provocateur Jake Lang
128	**Democratic Party survival.** Public confidence in the Democratic Party will decline even further in 2026 and will face a survival crisis by 2028.	**10/2/2025**	**2/18/2026 (AP)** Many Democrats are still down on the Democratic Party, a new AP-NORC poll finds. **2/28/2026 (AP)** Democratic confidence remains depressed in 2026. **5/5/2026 (Axios)** Axios reported growing Republican optimism about attracting more Black voters, particularly younger Black voters.
129	**Democratic Party split.** Centrist Democrats will see pressure to form their own party to keep the far Left at bay and to recapture moderate Republicans, particularly those who dislike Trump's personality.	**10/2/2025**	

THE MEYERS REPORT Forecasts for 2026 - 2027

https://meyersreport.news/

Updated: June 25, 2026

Past forecasting results at www.meyersreport.news. Forecasts for **2026 - 2027** are updated as events occur. **Forecasting team** of subject experts listed below.

Note: The Meyers Report forecasts should not be considered as recommendations for any investments, purchases, or other financial use by the reader.

No	Forecast / Event / Activity	Forecast Date	Result
130	**Public awareness of election risks will increase** due to educational program efforts.	**10/31/2025**	
131	**In 2026, A new voter list maintenance tool** will be introduced which will allow local and county voting officials to perform daily maintenance to their voter rolls in real-time. The tool combines local, county, state, and federal election data. It will allow officials to see if a voter is registered in more than one place and where they are registered, whether they are alive, dead, are illegal, ineligible or if they never existed.	**11/4/2025**	
132	**Voter Roles. In 2026** look for an emerging competitor to ERIC (Electronic Registration Information Center) that will measurably improve the quality of the voter rolls across the US.	**12/2/2025**	
133	**Save Act will not be passed** in 2026~~ or 2027~~, despite heroic efforts by supporters of voter ID. **5/14/2026 In 2026, an EO will cover the gap** and the Save Act will be passed after the Mid-terms.	**12/2/2025**	
134	**Same-day registration and voting.** Democrats will be doggedly pushing same-day registration/voting, and student voting, particularly in the seven swing states. They will use lawsuits and judicial forum shopping to achieve objectives.	**12/2/2025**	
135	**North Carolina Senate** seat **in 2026** will go Democrat.	**12/2/2025**	
136	**North Carolina Senate** seat **in 2028** will be a tossup. **5/21/2026 Caveat: If the Republicans take the Mid-terms**, a Republican is likely to get the seat in 2028.	**12/2/2025 modified 5/21/2026**	
137	**In 2026 DHS and DOJ will continue to outpace the other arms of government** in providing tools and resources that enable states to identify ineligible voters and to remove them from the voter rolls.	**12/2/2025**	**3/28/2026 (Texas Public Radio/NPR) DOJ acknowledged in federal court that it plans to share voter-registration data with DHS.** DHS will run the data through its SAVE citizenship-verification system. DOJ has sued more than two dozen states for refusing to hand over voter-roll data. States like Texas and Louisiana have already run entire voter lists through SAVE.
138	**Mail-in Ballots.** In 2026 and beyond, because of their high risk to "chain of custody" rules, mail-in ballot use will become more restricted and move toward need-based use, as opposed to universal and "no-excuse" mail-ins.	**9/19/2025**	

THE MEYERS REPORT Forecasts for 2026 - 2027

https://meyersreport.news/

Updated: June 25, 2026

Past forecasting results at www.meyersreport.news. Forecasts for **2026 - 2027** are updated as events occur. **Forecasting team** of subject experts listed below.

Note: The Meyers Report forecasts should not be considered as recommendations for any investments, purchases, or other financial use by the reader.

No	Forecast / Event / Activity	Forecast Date	Result
139	**Election reforms, Counting Mail-in Ballots.** Hopefully in 2026, but definitely by 2028, greater restrictions will be on mail in ballots. Counting of mail-ins will be limited to two days.	**11/4/2025**	
140	**Election reforms, Late Arriving Ballots.** In 2026, there will be no counting of "late arriving" ballots. Greater restrictions on mail in ballots. Counting of mail-ins will be limited to two days.	**11/4/2025**	
141	**Election reforms. Unexcused absentee ballots** will require an excuse. This will happen in stages and be generally accepted by the 2028 election.	**11/4/2025**	
142	**Election reforms. Ballot Harvesting** will be eliminated in stages by 2028, but it will be a process taking three years. (Families and guardians will be able to deliver absentee ballots.)	**11/4/2025**	
143	**Election reforms. Registration and ballot harvesting in retirement and Nursing Homes** will be restricted and made illegal by 2028 or sooner.	**11/4/2025**	**5/22/2026 (NCLS Voters in Long-Term Care Facilities report may 2026)** On Track. Several states have enacted or are actively advancing restrictions on third-party ballot harvesting and registration practices in nursing homes and retirement facilities.
144	**Election reforms, Hand-marked ballots.** More counties going to hand-marked ballots.	**11/4/2025**	**5/22/2026 (NCSL voting systems tracker May 2026 and The Current March 2026)** on track. Increasing number of counties and states shifting toward or requiring hand-marked paper ballots for security and auditability. Texas and Georgia are examples Basis and latest data: Continued adoption of paper-based systems.
145	**Election reforms, Hand-counted ballots.** Hand-counting of ballots will increase and be almost universal by the 2028 election.	**11/4/2025**	**5/22/2026 (NCSL voting systems tracker May 2026 and The Current March 2026)** tracking. Increasing number of counties and states shifting toward or requiring hand-marked paper ballots for security and auditability. Texas and Georgia are examples Basis and latest data: Continued adoption of paper-based systems.

THE MEYERS REPORT Forecasts for 2026 - 2027

https://meyersreport.news/

Updated: June 25, 2026

Past forecasting results at www.meyersreport.news. Forecasts for **2026 - 2027** are updated as events occur. **Forecasting team** of subject experts listed below.

Note: The Meyers Report forecasts should not be considered as recommendations for any investments, purchases, or other financial use by the reader.

No	Forecast / Event / Activity	Forecast Date	Result
146	**Election law enforcement.** Beginning in 2026, election law violations will be treated as real crimes, as they should be. There will be real enforcement with penalties that are hard.	**11/4/2025**	**3/5/2026 (US DOJ) A Pennsylvania resident charged with fraudulent voting** in the 2024 election. **3/8/2026 (DOJ) Pennsylvania defendant fraudulent voting,** claimed false citizenship, faces five years. **3/27/2026 (DOJ) Texas defendant charged with voter fraud,** identity theft, passport fraud. **5/1/2026 (NY Post) Former NJ mayoral candidate charged** with forgery of 1,000 voter registration applications and witness tampering. Pleaded guilty. **5/2/2026 (NY Post and DOJ) Charges filed against four noncitizens** in New Jersey in connection with illegally voting in federal elections and making false statements while applying for US citizenship. **5/22/2026 (NCSL voting systems tracker May 2026 and The Current March 2026) On track.** Increasing number of counties and states shifting toward or requiring hand-marked paper ballots for security and auditability. Texas and Georgia are examples Basis and latest data: Continued adoption of paper-based systems.
147	**Prosecutions coming.** Starting in May 2026 (or sooner) prosecutions for election fraud, lying to Congress and subverting Congressional and Presidential orders, and then going forward, more investigations will go public and more indictments. This will impact the 2026 mid-term elections.	**11/4/2025**	**3/11/2026 (DOJ and later AP) David Rivera indicted** alleged violations of campaign finance and lobbying laws, **4/29/26 (Wash. Post) Rubén Rocha Moya Indicted by the U.S. DOJ** for working with Venezuelan drug cartels. **4/30/2026 James Comey indicted for 2nd time** for inciting violence against President Trump. **5/4/2026 (ProtectDemocracy.org)** DOJ investigating Tim Walz, Jacob Frey, and Keith Ellison for retaliatory use of arrests, prosecutions, and investigations.
148	**Power of the Presidency will be expanded with (1) Additional authority to impound funds** authorized by Congress. **(2) Additional authority to discharge employees in the Executive Branch**, because they "serve at the pleasure of the President." **(3) Additional authority to terminate federal agencies,** also because they "serve at the pleasure of the President."	**11/1/2025**	**5/22/2026 (Federal News Network, Federal Register, the Whitehouse.Gov)** Trending These three items represent a concerted effort to expand presidential power over spending, personnel, and bureaucracy. Schedule F / discharge authority (2) has seen the most concrete progress. Impoundment (1) and agency termination (3) remain heavily litigated, with the administration winning some temporary victories in court but facing ongoing congressional and judicial pushback. No sweeping congressional approval has been granted for any of the three — progress has come primarily through executive action and favorable court stays.
149	**Greenland. In 2026 or 2027, rather than annexation,** US will do a security and investment agreement with Greenland and Denmark to development minerals and to insure the security of Greenland through the investment and expansion of military facilities.	**12/29/2025**	**5/22/2026 (Atlantic Council Strategy Paper, BBC, NYT, Reuters)** On track The prediction is holding up well. A non-annexation security + minerals framework was reached early in 2026, and concrete military expansion and investment talks are actively progressing. Full agreements are still being negotiated, but the direction and momentum match the forecast.

THE MEYERS REPORT Forecasts for 2026 - 2027

https://meyersreport.news/

Updated: June 25, 2026

Past forecasting results at www.meyersreport.news. Forecasts for **2026 - 2027** are updated as events occur. **Forecasting team** of subject experts listed below.

Note: The Meyers Report forecasts should not be considered as recommendations for any investments, purchases, or other financial use by the reader.

No	Forecast / Event / Activity	Forecast Date	Result
150	**In 2026, will see more wide-spread public demonstrations** protesting open immigration and related crime, restrictions on civil rights, and public corruption will spread throughout Europe and the EU and cause great friction within the EU.	**11/25/2025**	**5/1/2026 (Carnegie Global Protest Tracker, major outlets (BBC, Euronews, AP, Reuters)) On Track** "Thousands of farmers protest Mercosur deal" (Strasbourg, January 2026), "Hundreds of tractors rumble through Paris in protest over EU-Mercosur deal" (Paris, January 2026), "European Farmers Out on the Streets Against the EU-Mercosur Trade Deal" (multiple cities including Paris, Poland, Belgium, Ireland; January 2026), "Europe's Patriots rally in Milan against immigration" (Milan far-right anti-immigration rally with international leaders; April 18, 2026), "Fuel price protests, Ireland" (April 2026), "Massive May Day 2026 Protests in Paris as Thousands March for Workers' Rights" (May 1, 2026)
151	**France.** Despite internal unrest, Macron will not resign.	**11/1/2025**	**5/23/2026 (France 24 on 4/24/26) Accurate** - French President Emmanuel Macron said Thursday that he will quit politics in 2027 as the final year in his second term approaches. He added that at this late stage in office, the "hardest thing" was to strike a balance between defending his record and acknowledging what "didn't work out".
152	**UK. Kier Starmer will not survive as PM** until 2029. Labour will oust him and replace him with another leader in an attempt to improve their chances of winning the next General Election in 2029.	**11/1/2025**	**5/8/2026 (BBC) Trending** Sir Keir Starmer has insisted he will not quit as prime minister and "plunge the country into chaos", as Labour reels from significant election losses. The results in England, Scotland and Wales have piled pressure on Sir Keir, with some Labour MPs calling for him to set a timetable for his departure, although his cabinet allies have backed him for now. **6/23/2026 Kier Starmer resigns as PM and sets exit date.**
153	**In the 2029 UK General Election, Reform UK will win the most seats** and their leader will become Prime Minister, **(5/14/2026) it will ~~not~~ be Nigel Farage.**	**11/1/2025 updated 5/14/2026**	**5/8/2026 (The Gruadian) Too early, partially on track.** Reform UK had a very strong performance in the May 2026 local elections, winning hundreds of seats and making significant gains in traditional Labour and Conservative areas. This has boosted their national profile and polling. However, winning the most seats nationally in 2029 remains a very tall order. Farage is still very much leading the party as of late May 2026.

THE MEYERS REPORT Forecasts for 2026 - 2027

https://meyersreport.news/

Updated: June 25, 2026

Past forecasting results at www.meyersreport.news. Forecasts for **2026 - 2027** are updated as events occur. **Forecasting team** of subject experts listed below.

Note: The Meyers Report forecasts should not be considered as recommendations for any investments, purchases, or other financial use by the reader.

No	Forecast / Event / Activity	Forecast Date	Result
154	**In the 2026 local elections, Reform UK will win** both the popular vote, and the most council seats nationwide. **Plaid Cymru, the left-wing Welsh Nationalist party, will lead the next Welsh government**, unseating Labour, who have controlled the Welsh Parliament for its entire existence. Similarly, the left-wing **Scottish Nationalist Party (SNP) will take back control of the Scottish Parliament**, boosting the campaign for **Scottish independence** from the United Kingdom, and calls for a second referendum on the issue.	**12/28/2025**	**5/9/2026 (BBC News) 1. Reform UK** in the 2026 UK Local Elections (England) **Accurate.** Reform UK achieved a major breakthrough: Won the popular vote with approximately 26–27%.Gained the most council seats nationwide, securing around 1,453–1,454 seats (a net gain of over 1,400). **2. Plaid Cymru** in Wales (Senedd Election) **Accurate.** Plaid Cymru won the most seats (43 out of 96) in the 2026 Senedd election and became the largest party, unseating Labour as the leading force. They are now in a position to lead the next Welsh government (likely in coalition). **3. SNP in Scotland** (Scottish Parliament Election) **Partially Accurate.**The SNP remained the largest party with 58 seats but fell short of a majority and lost seats compared to previous elections. They did not convincingly "take back control" in a dominant way, though they continue to lead the Scottish government. Calls for a second independence referendum have been boosted but remain stalled.
155	**UK civil rights and free speech issues will continue and get worse.** King Charles III will stay silent in the process, adding further fire to the demonstrations. At the forefront of this will be the government's attempts to erode the historic institution of **trial by jury.**	**11/1/2025**	**5/16/2026 (The Telegraph) On Track 1. "MPs have voted to allow a bill that would curb access to jury trials** in England and Wales to progress to the next stage, despite some Labour MPs stating their opposition to the reforms." "King Charles III has so far remained silent on the growing controversy surrounding the government's plans to restrict jury trials. His silence has only added fuel to the demonstrations, with some protesters calling on the monarch to speak out in defence of British traditions."
156	**The UK issue of "Pakistani rape gangs" and police lack of enforcement will resurface, creating even more domestic political chaos.**	**11/1/2025**	**3/31/2026 (commonslibrary.parliament.uk)** The UK government formally launched a new national statutory inquiry into grooming gangs, beginning April 2026. This followed a 2025 national audit (Casey report) that reignited debate.
157	**UK peaceful demonstrations could get violent, but by the Left, not the Conservative UK citizens.**	**11/1/2025**	**4/11/2026 (ITVX and Al Jazeera)** More than 523 people were arrested during a mass protest in Trafalgar Square opposing the ban on Palestine Action. **5/16/2026 (Reuters) On track On May 16, 2026, two large rival marches took place in central London: The "Unite the Kingdom" anti-immigration rally** (organised by right-leaning/far-right groups). A counter-protest by left-wing/pro-Palestine/anti-racism groups. Police deployed 4,000 officers to keep the groups apart. There were clashes, **43 arrests, and reports of violence involving masked counter-protesters (often described as left-wing or Antifa-linked.)**

Note: The Meyers Report forecasts should not be considered as recommendations for any investments, purchases, or other financial use by the reader.

No	Forecast / Event / Activity	Forecast Date	Result
158	**In 2026, the UK which started the industrial revolution** will see the closing of it of its last two primary steel plants and will be processing scrap-steel only.	**12/1/2025**	**3/16/2026) Nation.CYMRU)** The UK Government spent £377 million to prevent the closure of the country's last remaining blast furnaces at British Steel's Scunthorpe plant, according to a new report. **5/72026 (London Daily)** UK Government Assumes Control of British Steel's Scunthorpe Plant Amid Shutdown threat. **5/23/2026 (The Guardian)** Key Facts (as of May 2026): The plant loses tens of millions of pounds per month without subsidies.The UK government has provided hundreds of millions of pounds in emergency funding since 2025. At peak periods, the daily subsidy has been reported as high as £1.3 million per day. The operation is widely described in industry reports as economically unviable in its current form without taxpayer support.
159	**On Jan. 1, 2026, Bulgaria** will adopt the Euro, and will stay. Electronic banking might be down for several hours to as long as a week.	**12/10/2025**	**1/1/026 (EU Parliament) Bulgaria officially adopted the euro on January 1, 2026,** becoming the 21st eurozone member. **5//2026 (CourtHouseNews.com)** Bulgaria takes hesitant step into the eurozone, there were nationwide protests and political unrest and even isolated riots
160	**On Jan. 1, 2026, Bulgaria** will adopt the Euro, and will stay. However, legal counter efforts will continue; public protests against the Euro will not be noticeable.	**12/10/2025**	**1/1/026 (EU Parliament) Bulgaria** takes hesitant step into the eurozone, there were nationwide protests and political unrest and even isolated riots. 4/9/2026 **(European Central Bank)** Accurate Basis and latest data Opposition existed but was not strong enough to prevent or noticeably disrupt the changeover once it happened. The euro is now Bulgaria's everyday currency with growing acceptance.
161	**Bulgaria** will be damaged economically in the form of a recession that could last two to five years.	**12/10/2025**	**12/18/2026 (Reuters) Thousands rally in Bulgaria against corruption**, call for judicial reform. **5/21/2026 (Economy and Finance-official EU wbsite)** Unlikely- Basis and latest Data Real GDP growth is forecast to decelerate over the forecast horizon, mostly due to slowing growth of domestic demand. Private consumption growth is set to ease, reflecting weaker consumer confidence and lower wage growth. Public consumption is forecast to continue supporting GDP growth, which is forecast to be 2.5% and 2.2% in 2026 and 2027, respectively. Higher energy prices are expected to drive inflation up in 2026. The government deficit is set to exceed 4% of GDP in 2026 and 2027, driven by social spending and public sector wages. The debt-to-GDP ratio is expected to reach 35.5% by 2027.
162	**Bulgarian public anti-corruption protests will continue** and intensify, as will "professional" counter-protesters.	**12/10/2025**	**2/12/2026 (TP World) Violence breaks out in Sofia as Bulgarians** protest over budget and corruption

THE MEYERS REPORT Forecasts for 2026 - 2027

Note: The Meyers Report forecasts should not be considered as recommendations for any investments, purchases, or other financial use by the reader.

No	Forecast / Event / Activity	Forecast Date	Result
163	**Bulgarian political instability will continue.** Government will keep opposition under surveillance and will crackdown on protesters, even if they remain peaceful.	**12/10/2025**	**4/14/2026 (Sofia Globe)** Police have confiscated a million euro so far in operations against vote-buying ahead of Bulgaria's April 19 2026 early parliamentary elections. **4/30/2026 (Guardian)** reported that a Civil Liberties Union for Europe report identified Bulgaria as one of several EU countries "consistently dismantling rule of law," with attacks on civil society, criminalization of dissent, weakened judicial independence, pressure on journalists, and restrictions affecting protesters and watchdog groups.
164	**Serbian** government is surveilling opposition politicians and anti-corruption protesters. This was triggered by student deaths.	**12/18/2025**	**4/2/2026 (Reuters and StreetInsider.com)** reported that Serbia remained in a deep political crisis, with anti-government and anti-corruption protests continuing nationwide.
165	**Serbian protesters against government censorship will continue**.	**12/18/2025**	**3/20/2026 (Media Freedom Rapid Response)** Continuing "attacks and pressure on independent journalists, violence against journalists during protests, concerns over "media capture," and "digital threats against journalists"
166	**Serbian protesters are fighting against the development of "rare earths" mining**, because of environmental concerns.	**12/18/2025**	1/17/2026 (Youtube and Reuters) Thousands protested in cities including Novi Sad demonstrations remained part of a broader anti-government movement that included environmental grievances tied to the development of lithium and rare earths.
167	**US policy objectives:** 1) Counter Chinese influence in individual countries. 2) Make sure US has access to critical minerals and resources, 3) Secure critical waterways, particularly in the Gulf of Aden and Cape Horn, 4) Limit use of countries as Chinese proxies for wars and economic control, 5) Reduce wars and genocides.	**12/28/2025**	
168	**South Africa. By 2028, p**ressures will build for a separation of the West Cape section of South Africa to secede. **If they are successful,** there will be a movement to make them a **protectorate of the US (like Guam)**, which will be opposed by US liberals.	**11/1/2025**	
169	**South Africa. US sanctions** against corrupt government figures will be delayed for US internal political reasons until 2027, possibly later.	**11/1/2025**	**6/6/2026 (congress.gov) Status: On track** (no sanctions imposed as of June 2026). Key 2026 Data: H.R. 2633 (U.S.-South Africa Bilateral Relations Review Act of 2025) remains in legislative process without resulting in enacted sanctions.
170	**Kenya.** Long a stable country, in 2026, look for Kenya's economy to continue growing, and remain stable. Kenyan GDP should remain strong in with at least a 4.25% growth and inflation at a similar number, which is an improvement from the 9% inflation of recent years.	**12/28/2025**	

THE MEYERS REPORT Forecasts for 2026 - 2027

Updated: June 25, 2026

Past forecasting results at www.meyersreport.news. Forecasts for **2026 - 2027** are updated as events occur. **Forecasting team** of subject experts listed below.

Note: The Meyers Report forecasts should not be considered as recommendations for any investments, purchases, or other financial use by the reader.

No	Forecast / Event / Activity	Forecast Date	Result
171	**Kenya.** US private investment will aid in keeping US-Kenyan ties strong.	**12/28/2025**	
172	**Somaliland.** De facto alignment with US will increase in 2026. Formal recognition still is risky and may take till 2028. US interest in Somaliland is buoyed because of the stability of the state and it is a functioning hybrid Democracy.	**12/28/2025**	
173	**Somalia in 2026** will maintain claims over Somaliland territory, but will get nowhere, as more nations recognize Somaliland independence. In 2026, Somalia will state it is instituting universal suffrage, but it will not. Somalia has not had a free election since 1969.	**12/28/2025**	
174	**Democratic Republic of Congo.** If its war with Rwanda gets settled, the US will trade routes and rules, but China will keep it access to the mines.	**12/28/2025**	
175	**Rwanda** in 2026 will make conciliatory advances to the US in settlement of its war with the Democratic Republic of Congo. However, as skilled hedgers, they will not give up their ties to China.	**12/28/2025**	
176	**US policy objectives:** 1) Contain Chinese military and economic expansion/domination in Philippines, 2) Protect access in critical waterways including Straits of Malacca, South China Sea and shipping around the Philippines. 3) Keep Philippine sea-oil in control by Philippines. 4) Stop Chinese infiltration and destabilization of Southeast Asian countries.	**12/28/2025**	**6/3/2026 (Asialink.unimelb) Status: On track** US-Philippines cooperation has expanded with additional EDCA infrastructure, over 500 planned military engagements, and joint statements condemning Chinese coercion in the South China Sea. All four objectives are reflected in current US-Philippines actions.
177	**China-Taiwan tensions will not ease.** If tensions ease, it will be the result of Trump and masterful diplomacy, but no invasion attempt before 2028, if then, and only if a Democrat has the White House.	**11/1/2025**	**6/3/2026 (Asialink.unimelb) Status: On track** US-Philippines cooperation has expanded with additional EDCA infrastructure, over 500 planned military engagements, and joint statements condemning Chinese coercion in the South China Sea. All four objectives are reflected in current US-Philippines actions.
178	**Philippines/China.** China will try to destabilize the government of Philippine President Marcos over the next three years.	**11/1/2025**	**3/6/2026 (The Diplomat) Exposing internal Chinese political plants (spies and influence networks) 6/12026 (Anadolu Agency - AA) Status: On Track** Marcos continues diplomatic and operational pushback against Chinese activities, including joint statements and enhanced cooperation with the US. Resistance to Chinese influence and naval pressure has continued and increased.

No	Forecast / Event / Activity	Forecast Date	Result
179	**Philippines. President Marcos will increase efforts** to restrict Chinese influence in his country. He will expose internal Chinese political plants and will stand up to Chinese naval challenges to Philippine territory and naval intimidation.	**11/1/2025**	**3/6/2026 (The Diplomat) Exposing internal Chinese political plants (spies and influence networks) Status: On Track.** February 13, 2026 arrests of two Chinese nationals in Iloilo suspected of spying. **March 2026 announcement by the Philippines National Security Council** that it had dismantled a Chinese espionage network operating inside Philippine government agencies.
180	**China. Chinese challenges to Philippine sovereignty** of its territorial waters will continue to increase.	**11/1/2025**	**4/15/2026 (Reuters) Status: On Track** Chinese challenges to Philippine sovereignty in the West Philippine Sea have continued and, in key respects, intensified during the first half of 2026. Beijing has sustained and escalated its gray-zone pressure through persistent China Coast Guard (CCG) and maritime militia presence, dangerous maneuvers, water cannon attacks, blocking of resupply missions, deployment of floating barriers, and live-fire drills near Philippine-claimed features.
181	**Philippines. US presence is increasing,** including rotating troop training and construction of additional facilities**.**	**11/1/2025**	**3/4/2026 (congress.gov) Status: On Track** Trump Administration officials have reaffirmed the "ironclad" U.S. commitment to the Philippines, including by supporting the Philippines' military modernization, deploying advanced missile systems in combined exercises, and initiating a new bilateral task force to deter PRC coercion in the South China Sea. As part of the National Defense Authorization Act of 2026 (P.L. 119-60), Congress authorized up to $2.5 billion in Foreign Military Financing (FMF) and up to $1 billion in loans for military sales for the Philippines.
182	**Philippines. Will prepare for a possible war** with China and put their troops on an increased state of readiness. And will increase their defense spending.	**11/1/2025**	**4/20/2026 (Reuters) The Philippines is participating in its largest-ever** Balikatan exercises in 2026, involving 17,000+ troops with the U.S. and allies. 6/9/2026 (Reuters)
183	**Philippines. In 2028, the next Philippine President will be Gilbert Teodoro,** who will continue pro-US and anti-Chinese policies.	**11/1/2025**	
184	**(US policy objectives:** 1) Improve relations with Latin and South America and develop an economic sphere of cooperation for the Western Hemisphere (North and South America) that can be independent and self-sufficient in the event Europe collapses, and it is us against the Chinese and the Russians, 2) Break the Cuban economy and foster regime change in Cuba, Venezuela, and other Chinese proxies.	**12/28/2025**	**5/26/2026 (Congressional Research Service) and Shield of the Americas Summit outcomes and reciprocal trade deals (March 2026). Status: Tracking** Venezuela objective largely achieved (Maduro removed, U.S. economic control increased). Cuba is under severe and escalating economic duress with an explicit regime-change timeline, though full collapse or transition has not yet occurred as of early June 2026. The strategy of using Venezuela as leverage against Cuba is working as intended.

THE MEYERS REPORT Forecasts for 2026 - 2027

Updated: June 25, 2026

Past forecasting results at www.meyersreport.news. Forecasts for **2026 - 2027** are updated as events occur. **Forecasting team** of subject experts listed below.

Note: The Meyers Report forecasts should not be considered as recommendations for any investments, purchases, or other financial use by the reader.

No	Forecast / Event / Activity	Forecast Date	Result
185	**Mexico. Quietly, Claudia Scheinbaum-US cooperation will continue** on issues of the border, drugs, and trafficking. In 2027, after the Mexican mid-term elections, Scheinbaum's cooperation will be more open because she will not be subject to recall.	**11/1/2025**	**5/20/2026 (Washington Post)** During a May 2026 visit by the U.S. Homeland Security Secretary, Sheinbaum announced that both governments had agreed to maintain bilateral cooperation based on mutual respect while continuing joint security efforts. President Claudia Sheinbaum has maintained quiet but substantive operational cooperation with the United States on migration control, fentanyl precursor seizures, lab dismantlement, and extraditions, even while publicly emphasizing Mexican sovereignty and rejecting unilateral U.S. military intervention.
186	**Cuba also is a real target for US South American policy.** Economically, Cuba will be found to be more fragile and subject to regime change. This will be done by US cutting off Cuba's economic sugar daddy's.	**12/10/2025**	**5/14/2025 (Al Jazeera) "Absolutely no fuel "Cuba hit by blackouts, protests amid power outages" Status Trending.** "We have absolutely no fuel, oil, and absolutely no diesel," Energy Minister Vicente de la O Levy said during a late Wednesday news conference. "The situation is very tense. The impact of the blockade is causing us significant harm, and we are still not receiving fuel," he added. "The situation of the National Electric System has become particularly tense in recent days," Diaz-Canel said in a statement on Wednesday, saying that the country was expected to face a deficit of more than 2,000 megawatts during the evening's peak demand hours.
187	**US investment will expand in cooperative Latin American countries.**	**11/1/2025**	**2/3/2026 (Investing.com)** The U.S. and **Mexico** launched coordinated policies on: critical minerals, strategic supply chains, and trade integration. **2/5/2026 (Investing.com) Argentina**, US sign reciprocal trade and investment agreement as part of a new trade and investment agreement that prohibits barriers to digital trade and enhances cooperation on economic and national security issues. **2/11/2026 (Investing.com)** U.S. officials encouraged expanded American investment in **Venezuela**'s: oil, natural gas, and electricity. **2/12/2026 (Wall Street Journal)** I Squared Capital and CPP Investments finalized a $3.4 billion acquisition of **Peruvian** power producer Inkia Energy. **2/17/2026 (Reuters) Brazil** telecom infrastructure--Macquarie Asset Management acquired IHS Holding's South American wireless tower assets for approximately $685 million. **3/11/2026 (Investing.com) Chile** and US signed a joint statement to begin cooperation on: rare earths, lithium, and other critical minerals. 3/20/2026 (Reddit) South American renewable energy and green hydrogen expansion of energy-investmentincluding: accelerating renewable-energy and green-hydrogen investment across **Brazil, Chile, Colombia, Argentina, and Peru. 4/10/2026 (Reuters/Investing.com)** Washington launched its "most assertive push in years" to strengthen ties with **Peru** ahead of **Peru**'s 2026 elections."

Updated: June 25, 2026

Past forecasting results at www.meyersreport.news. Forecasts for **2026 - 2027** are updated as events occur. **Forecasting team** of subject experts listed below.

Note: The Meyers Report forecasts should not be considered as recommendations for any investments, purchases, or other financial use by the reader.

No	Forecast / Event / Activity	Forecast Date	Result
188	**China-South America.** China will lose influence in South America in 2026 and 2027 as US gains influence.	**11/1/2025**	**3/2/2026 (Reuters)** The United States openly launched a campaign to counter China in Latin America. 4/2/2026 (Reuters) Panama canceled Chinese-linked port concessions after mounting U.S. pressure. 4**/30/2026 (Reuters)** Paraguay continued diplomatic recognition of Taiwan despite increasing Chinese pressure.
189	**South America--Venezuela.** (1) Increased military action against the cartels may bring the Maduro government down. However, our bet is that Maduro will need to cooperate with President Trump, or he will face greater internal pressure for regime change. The pressure will come from the US Naval presence off the Venezuelan coast and from the potential for a rapid deployment of the 82nd and 101st Airbourne divisions.	**11/1/2025**	**5/7/2026 (Archive.ph)** On Jan. 3, 2026, Maduro arrested and is and is sitting in a US prison. The ground forces were elements of the 82nd Airborne Division based at Fort Bragg , and elements tied to the 101st Airborne Division based at Fort Campbell.
190	**South America--Venezuela, end-game.** Look for a soft coup eliminating Maduro and cutting a new deal with the military. This will allow for the appearance of regime change, but still keeping country stability. **Maduro either will wind up in a US prison or exiled to a friendly country.**	**12/10/2025**	**5/7/2026 (Archive.ph)** On Jan. 3, 2026, Maduro arrested and is and is sitting in a US prison.
191	**South America--Columbia** after May 2026 elections, relations with US will get better as a more centrist president is elected. Look for Columbia to keep US defense ties and maintenance support for their current military equipment, thus making Columbia less vulnerable to greater domestic insurgency.	**11/1/2025**

No	Forecast / Event / Activity	Forecast Date	Result
192	**US foreign policy in South America** will focus on bringing South America closer to the US economically and politically, to counter Chinese and Russian, and Iranian influence. **Illicit drugs, weapons and human trafficking and oil will be the dominant themes.**	**12/10/2025**	**2/3/2026 (Investing.com)** The U.S. and **Mexico** launched coordinated policies on: critical minerals, strategic supply chains, and trade integration. **2/5/2026 (Investing.com) Argentina**, US sign reciprocal trade and investment agreement as part of a new trade and investment agreement that prohibits barriers to digital trade and enhances cooperation on economic and national security issues. **2/11/2026 (Investing.com)** U.S. officials encouraged expanded American investment in **Venezuela**'s: oil, natural gas, and electricity. **2/12/2026 (Wall Street Journal)** I Squared Capital and CPP Investments finalized a $3.4 billion acquisition of **Peruvian** power producer Inkia Energy. **2/17/2026 (Reuters) Brazil** telecom infrastructure--Macquarie Asset Management acquired IHS Holding's South American wireless tower assets for approximately $685 million. **3/11/2026 (Investing.com) Chile** and US signed a joint statement to begin cooperation on: rare earths, lithium, and other critical minerals. 3/20/2026 (Reddit) South American renewable energy and green hydrogen expansion of energy-investmentincluding: accelerating renewable-energy and green-hydrogen investment across **Brazil, Chile, Colombia, Argentina, and Peru. 4/10/2026 (Reuters/Investing.com)** Washington launched its "most assertive push in years" to strengthen ties with **Peru** ahead of **Peru**'s 2026 elections."
193	**Argentina. Milei to push for a weaker currency to promote exports. The US will buy more beef from Argentina.**	**12/28/2025**	**2/11/2026 (Peterson International Economics Institution)** Argentina put a monetary policy in place to devalue their currency to sell more beef to US to inject US dollars into their economy.
194	**Cuba will see a regime change in 2026, possibly 2027** from economic collapse because of the fall of Maduro and Venezuela's money.	**12/28/2025**	
195	**(Five forecasts) US policy objectives:** (1) Protecting access to Middle East oil, (2) Maintain peace by restricting Iran and its proxies, (3) Keeping Hamas and Hezbollah disarmed and neutered politically, (4) Protecting access to the Suez Canal and Straits of Hormuz, (5) Getting control of ports on the Gulf of Aden and the Horn of Africa to accomplish the previous objectives.	**12/28/2025**	
196	**Iran and its nuclear policy will be held in check,** at least while President Trump is in office.	**11/1/2025**	**2/28/2026** US took out the balance of the Iranian nuclear production capacity and Iran's virtually all of conventional capacity.

Note: The Meyers Report forecasts should not be considered as recommendations for any investments, purchases, or other financial use by the reader.

No	Forecast / Event / Activity	Forecast Date	Result
197	**Venezuela. A limited number of US troops** will be stationed in Venezuela for protection duty, probably within the next 60-90 days.	**1/14/2026**	**5/5/2026 (The Meyers Report)** US companies are bidding on the building of facilities for a limited number of US troops to be housed in Venezuela.
198	**Iran. US troops** will be deployed in 2026 to Iran as part of the regime change.	**1/14/2026**	
199	**Election fraud. Tina Peters** (Mesa County Clerk) will be released on time served by July 4, 2026.	**1/14/2026**	**6/1/2026 Tina Peters relaeased from prison on time served.**
200	**Eastern Europe weather and heating fuel costs. Over the next two months severe cold will trigger serious gas shortages and price spikes**.	**1/16/2026**	**3/27/2026 (Euronews) European gas prices up 70% month-to-month in March 2026.**
201	**UK public protesters** will ratchet up noticeably in April and May, 2026, and will impact elections.	**1/25/2026**	**3/31/2026 (Ipsos and Stand Up to Racism)** Reported half a million march together against the far right.
202	**Strategic Oil Reserve.** Because of the current high prices, expect President Trump to sell off he reserve and buy back when prices fall, and then refill the SPR in late 2026 or 2027.	**5/3/2026**	
203	**The federal midterm elections will be** run differently and use the voter roles approved by the DOJ, authorized by Article 2 of the International Emergency Powers Act (Sept. 12, 2018.)	**5/4/2026**	
204	**Iran war will be settled within the next two months,** because Iran is in economic collapse, Iran's are near destruction because they may have to be shut down, and will no longer be capable of dominating events in the Middle East.	**5/5/2026**	**6/19/2026 Iran and US sign an initial Memorandum of Understanding**, as a prelude to a final agreement.
205	**Inflation.** By year end the annualized inflation rate will be down to 3.5% or likely lower.	**5/5/2026**	
206	**Interest rates. By year end, the** 10-treasury will fall below 4.0% or lower, the 30-Fixed Home Mortgage will be at 6.0% or lower and the 15-Fixed mortgage will go 5.0% or lower.	**5/5/2026**	
207	**Fed monetary policy.** The M2 measure of money will grow at a rate of 5%-6% in 2026.	**5/5/2026**	
208	**Andy Burnham will win the Manchester Parliament Seat and be Prime Minister** by the end of the year.	**5/23/2026**	**6/14/2026 Andy Burnham won his seat in the British Parliament.**

No	Forecast / Event / Activity	Forecast Date	Result
209	**New York voter rolls.** US Department of Justice will state that 10% or more of NY voter rolls are fraudulant.	**6/17/2026**	
210	**November Elections will not be cancelled.** There are rumors floating by both the right and the left of a 50% chance that Pres. Trump will cancel the midterm-election. The right says because of gross election fraud. The left says because Pres. Trump is a dictator. Both are wrong, because Pres. Trump has immense respect for the institutions. The elections will be held. However, there could be several court cases challenging selected key results where election fraud is seriously questioned.	**6/23/2026**	
211	**Vladimir Putin may have to be gone** for settlement of Ukraine-Russia War or shortly thereafter. At this time there is no way out of the war if Putin stays. There is the question when.	**6/23/2026**	
212	**Voter proof of citizenship. California and New York** will face an executive order for manditory voter ID proving citizenship for the midterms, based on a national security emergency, which will succeed in court. Target date is the end of September +/-.	**6/25/2026**	
213	**Lost Congressional seats. New York State, before the 2028 elections**, will face a significant legal challenge which could cost the state three Congressional seats, based on the counting of non-citizens mostly in New York City.	**6/25/2026**
